about me.

I am a ham radio since the late 70s. In recent years I decided to develop some applications for my use. This work has been a challenge to learn new technologies. I shared the first version with some friends who liked the idea and so I decided to share with amateur radio operators around the world. Any comments and suggestion will be appreciated.

I would like to thanks my friends who have collaborated in the beta testing and my wife to be ever present in this work.

I hope it will be useful

thank you

J.Marcio PY4OG QRZ
