NEO LABS

SETUP · 4 STEPS

Hello, Ripple Lamp.

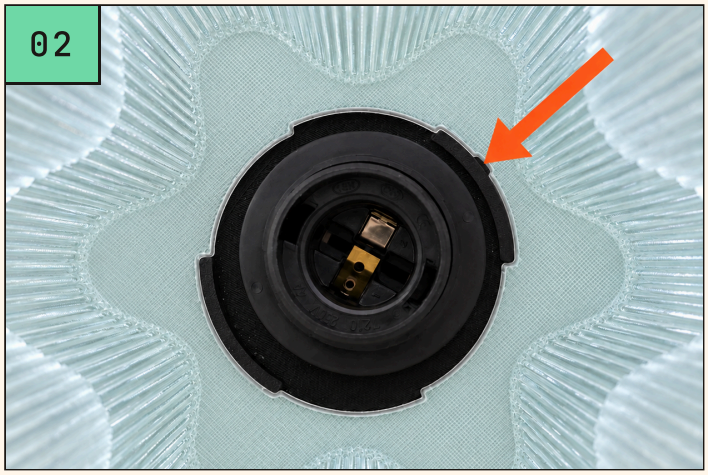
Four little steps and it's ready to glow. Takes about a minute.

01

Meet the base

Here's how it arrives. Stand it on its legs, socket facing up.

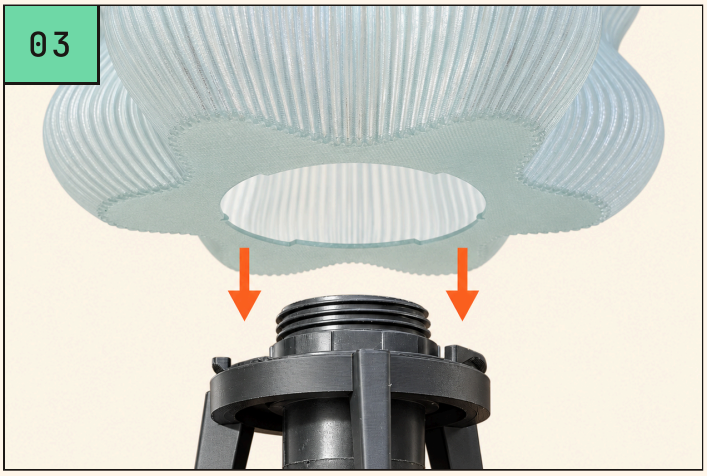
02



Find the wide slot

Look inside the shade for the wide-mouthed slot. Line it up with the ridges on the base.

03



Slot it on

Lower the shade straight down until it sits flat on the base.

04

Twist to lock

Turn the base anti-clockwise until it stops. That's it, locked in.

Thank you for bringing it home.
