Mineral oil heaters

They are widely used in the field of petroleum industries, manufacturing industries, dyeing and food industries....etc. We have all the required capacities from 100 kilocalories to 3000 kilocalories or the equivalent of 3 million calories.

We also have all types of boilers that operate on Electricity, Gas, Diesel and fuel oil, Coal or walnut shells, pistachios and compressed sawdust (billets).

Our boilers have been equipped with the latest electronic technologies and a programmed automatic control system that allows the user to monitor the boiler's performance and enter or modify the required temperatures and pressures and monitor the oil circulation within the boiler coil.

Faults can also be read and repaired through the control and monitoring screen (HMI).
