## Hot water and steam boilers

They are widely used in the field of petroleum industries, manufacturing industries, dyeing and food industries, etc. We have all the required capacities from 200 kg/h to 10 tons/h. We also have all types of boilers that operate on Electricity, Gas, Diesel and fuel oil, Coal or walnut shells, pistachios and compressed sawdust (billets).

Our boilers have been equipped with the latest electronic technologies and a programmed automatic control system that allows the user to monitor the boiler's performance and enter or modify the required temperatures and pressures and monitor multiple safety protections.

Faults can also be read and repaired through the control and monitoring screen (HMI).
