Looking for
Unity / C# developer

Open internship or full-time position as a
Unity / C# developer in a growing mixed reality startup

Join our team as a Unity developer and take an active role in shaping Rimon. You will have the opportunity to work with the core team in a growing startup. We strongly believe in Team spirit: **a team that laughs together, stays together.**

Your profile:

- Knowledge of software development in Unity (C#)
- Knowledge in augmented / mixed reality is an advantage
- Good structuring skills
- Interested and willing to learn
- Motivated to work in a fast-paced environment
- Fluent in English or German

Your commitment:

- Start: Flexible and by arrangement
- Duration: at least 3 months
- Workload: 40 -100
- Location: Zurich or home office

What we offer:

- Working in a growing startup team & environment.
- You have free time management and unlimited home office
- Possibility to work as a digital nomad
- Regular team events (mountain retreat, trips, bouldering and much more).
- Daily work with the latest technology
- Collaboration with the core team
- Flexible working hours
- Possibility of permanent employment after the internship
- We believe in ownership, so you will be held accountable from day one

A couple of words about Rimon:

We were founded in 2020 and have been working with smaller and larger companies to support their employees ever since. We do this by providing them with our manuals to help them complete their tasks while documenting their processes.

These manuals run on AR (augmented reality)-enabled devices such as phones, tablets and AR glasses. Rimon is developing a platform that allows companies to create their own interactive manuals, with the goal of becoming the leading platform for self-created AR manuals. We are doing our best to achieve this goal by minimizing the industry's barriers to entry into AR.

Former beloved team member:

"I would like to thank Rimon team very much for being supportive, inclusive, flexible and understanding.""It has been a great journey for me."*"I had many chances to apply my Unity knowledge to improve Rimon's framework{..}."*

Your next steps:

Meeting in person to discuss your mission and expectations

Small task to solve

Send CV and some words about why you want to join Rimon to **info@rimon-ar.ch**
