MACHINE LEARNING EXPERT

ABOUT NOONLI

We set ourselves an ambitious mission. Noonli (codename) aspires to change the way people think about nutrition. It aims to radically integrate nutritious eating into everyday life without the pain of reading research or making a bunch of diaries. It works by opening the browser, sharing your preferences and goals, and it takes care of the rest. You can cook interesting meals without too much planning. The position offers lots of influence and responsibility. It also offers an equitable share of the personal partnership and financial inclusion through generous equity.

ABOUT YOU

We are looking for highly self-motivated problem solvers. Who understands how to use machine learning and its applications. We are building a recommendation system. You have a strategic mindset with a hands-on approach.

- Some hands-on experience specializing in software engineering and ML
- Practical experience with Tensorflow or PyTorch and conducting ML experiments
- Some experience in deploying these solutions on AWS or Azure clouds (not mandatory)
- Excellent Communicator: Communicate solutions and approaches extremely well, managing both high-level and low-level details

YOU ARE PASSIONATE ABOUT

- Solving problems
- Pushing the limits on AI and ML
- And thrive in ambiguity, love organizing chaos
- Collaboration across different stakeholders, research communities, etc.

BENEFITS

Work from anywhere not as a optional policy but **as a rule**

Lots of responsibility

Limitless learnings

Generous Equity
