

## AR/MR Engineer Intern (40%-100%)

Do you want to bring in your ideas and contribute to the new way the world is going to fulfill tasks? Rimon is looking for great minds to reach its mission of **"Enable people by rethinking the manual"**.

Rimon develops a platform that allows companies to create their own interactive manuals. Supporting their frontline workers on the job, while documenting their process on-the-go. These interactive manuals run on AR capable devices, such as phones, tablets and AR-glasses.

### Your Profile:

- Studies in Computer Science or similar
- Knowledge of software development in C#, HTML
- Basic knowledge in mobile development and common databases
- Knowledge in Augmented/Mixed-Reality and Unity is an advantage
- Strong team & communication skills
- Good planning and structuring skills
- Interested and willing to learn
- Fluent in English or German

## Your Job:

- Conceptualization and development of components for the Rimon Pipeline
  - Development for the Rimon Framework on Hololens 2 and Smartphone
  - Shape the company culture to make Rimon a place you love to come to work to
- 

## Your Engagement:

- Start: Flexible and according to agreement
  - Duration: at least 3 months
  - Workload: 40 – 100%
  - Location: Zurich or home office
- 

## What we offer:

- Working in a fast startup team & environment
  - Close work with cutting edge technology and the founders of the company
  - Flexible working hours
  - Possibility for fixed position after internship
  - We believe in ownership, therefore you'll be empowered from day one
- 

## Interested?
