Rimon

Augmented Reality Engineer (80 – 100%)

Do you want to bring in your ideas, have impact on people and work with cutting-edge technology?

Rimon is looking for great minds to reach its mission "**Enable people by rethinking the manual**".

Rimon develops a platform that allows companies to create their own interactive manuals. Supporting their frontline workers on the job, while documenting their process on-the-go. These interactive manuals run on AR capable devices, such as phones, tablets and AR-glasses.

Your Profile:

- Studies in Computer Science or similar
- Knowledge of software development in C#, Python & JavaScript
- Basic knowledge in mobile development
- Knowledge in Augmented/Mixed-Reality, Unity and/or Django Framework is an advantage
- Knowledge in Azure and/or AWS is an advantage
- Strong team & communication skills
- Good planning and structuring skills
- Interested and willing to learn
- Fluent in English or German

Rimon

Your Job:

- Conceptualization and development of components for the Rimon Platform
- Development for the Rimon Framework on HoloLens 2 and Smartphone
- Shape the company culture to make Rimon a place you love to work at

Your Engagement:

- Start: Flexible and according to agreement
- Duration: N/A
- Workload: 80 - 100%
- Location: Zurich or home office

What we offer:

- Working in a fast startup team & environment with open communication culture
- Close work with cutting edge technology and the founders of the company
- Knowledge transfer from the team and from close partners
- Compensation also comes with stock options
- We believe in ownership, therefore you'll be empowered from day one
