# The Role – Machine Learning & Data Science Intern (100%)

## Responsibilities

- Create and maintain data pipelines of trade law documents
- Collaborate with trade law experts to understand legal requirements, ensure data accuracy, and automate quality control processes
- Develop new machine learning features integrated in Besso's product

## What we offer

- Full-time role, remote-first position
- **Hands-On Experience:** The person will gain practical experience in their field of study, contributing to their professional growth
- **Skill Enhancement:** Opportunities to learn and apply new skills, including exposure to real-world scenarios.
- **Networking and Mentorship:** Interaction with experienced professionals within the organization.
- **Project Exposure:** Involvement in projects that contribute to the organization's goals.

## Our buzz, you ask?

- Purpose and Vision
  - Democratize access to trade (regulation)
  - Untangle global value chains for the benefit of inclusiveness and sustainability
- Values
  - Purpose-driven
  - Courageous
  - Customer-centric
  - Transparent

# Our Expectations

## Tech Stack / Hard Skills (need to have)

- A strong foundation in data science, data, engineering, computer science, or a related field
- Experience with SQL and NoSQL databases, data architecture and data pipelines creation.
- Good knowledge of machine learning and natural language processing techniques.
- Proficiency in Python. Familiarity with libraries such as LangChain, Pydantic, Pandas and NumPy is a big plus.

## Tech Stack / Hard Skills (a big plus)

- Fascination for topics of cross-border trade, regulation, and compliance, eagerness to engage with domain experts
- Experience with Agile frameworks
- Experience with CD/CI and git.
- Experience with cloud providers.

## Profile / Soft Skills

- A purpose-driven individual, open-minded and eager to discuss and collaborate effectively
- Entrepreneurial nature, innovative thinking, and problem-solving skills
- Motivation to learn and improve
- Geek attitude to LLMs, combined with visionary mindset for the growth and future of the AI team
