

About Frojigo:

Frojigo is a fast-growing B2B SaaS startup focused on building an AI-powered platform for Environmental, Social, and Governance (ESG) solutions. Our platform provides powerful solutions for ESG reporting, analysis, and optimization using data-driven insights, cutting-edge machine learning and AI techniques, and user-friendly interfaces. As we continue to expand, we're looking for talented and motivated individuals to join our innovative team and contribute to the future of data analytics and sustainable technologies.

Overview:

We are seeking a dynamic and passionate Sustainability Analyst to join our product management team. You will work closely with our product and technical teams to help build and various features for our ESG AI-powered platform. In this role, you'll translate the challenges and needs of sustainability analysts into software solutions that help businesses meet their ESG goals. This position offers a great opportunity to work in a fast-paced startup environment, tackle real-world problems, and contribute to the development of a cutting-edge platform in the growing field of ESG.

Responsibilities:

- Research and analyze sustainability trends and regulations.
- Assist in developing and refining ESG tools and frameworks.
- Prepare reports and insights to inform product development.
- Engage with the team to innovate and optimize our platform's impact.

What We Offer:

- Flexible working hours: Perfect for students or those with other commitments.
- 100% remote: Work from wherever you are.
- Reimbursements: Expenses like conference attendance and travel for events are covered.
- Growth opportunity: This role may transition into a paid position within 6 - 12 months.

Requirements:

- Interest or background in ESG, sustainability, or a related field.
- Strong analytical and communication skills.
- Ability to work independently and collaboratively.
- Availability for part-time work (students welcome!).
