

Software Engineer (Full-Stack, Frontend Focus) – Zurich

At **Arcton**, we're building the **Cursor for Fundraising & Sales** – helping startup founders and small teams set up from prompt to live Email & LinkedIn campaign in minutes.

In just 6 weeks since launch, we already have **15 paying clients** and are growing at **200% month-over-month**. You can check out our **V1 product here**:
<https://app.arcton.com/>.

We're now looking for a talented **Software Engineer** with a strong eye for **frontend design and user experience** to join us in Zurich. You'll work across the stack, but with a focus on creating beautiful, intuitive interfaces that make complex sales workflows feel effortless.

What you'll do

- Own and refine Arcton's frontend and user experience.
- Contribute to full-stack development, from product features to integrations.
- Work closely with the founders to shape product direction and design.
- Play a key role in scaling a product that's already getting real traction.

What we're looking for

- Strong skills in **frontend/UI development** with an eye for design.
- Comfortable working across the **full stack**.
- Excited about **early-stage startups** and willing to take ownership.
- Based in or open to relocating to **Zurich**.

Why join us

- Be part of a startup with proven traction and rapid growth.
- Opportunity to grow into a **founding engineer** or even **co-founder role**.
- Direct influence on product, culture, and direction from day one.
