## CRM

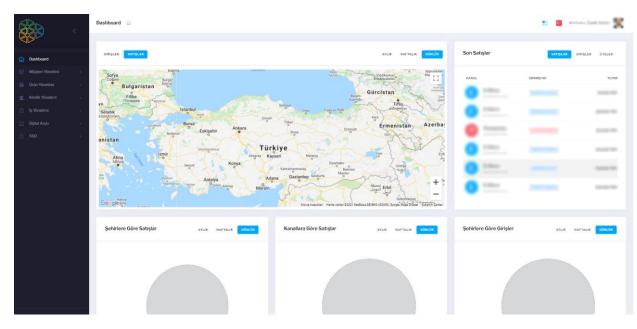

#### **Project Summary**

I worked as a Vue developer in the CRM project, where we provide specific solutions for companies. I designed the templates of the pages, ensured that they were connected to databases, and took part in the development of new technologies.

### IDAM

### **Project Summary**

In the IDAM project, which is also one of the solutions we provide to customers, I was a part of the Vue team, where we connected the project with the databases and designed the pages.

• User Profile

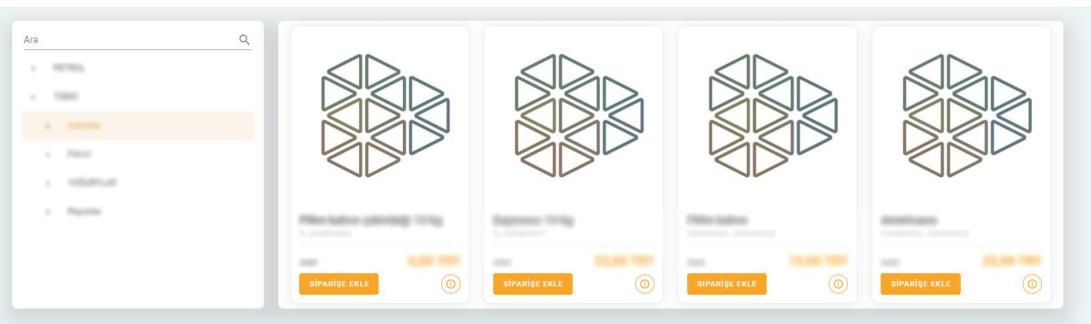

### B2B

**Project Summary** 

In this project, which we developed with Vue as PWA, besides contributing to R&D, I took an active role in the software team and fulfilled the database connections and general design tasks.

# B2B Mobil

### **Project Summary**

 $\succ$  In this project, which we transferred the B2B web based project to the mobile application with React-Native. I took an end-to-end role and was responsible for the development and design of the application by providing the Firebase infrastructure of the application, push notification, i18n etc. I had full responsibility for ensuring the integration of technologies.
