

Technical Service Information

GM 10L80/90 VALVE BODY PART UNIQUE NUMBER

COMPLAINT: After valve body replacement, the TCM has not accepted the Part Unique Number during the characterization procedure. The scan tool will indicate the PUN number entered is incorrect.

CAUSE: The PUN number can contain the number 0 and the letter O, it is important to distinguish between the number 0 and the letter O so the PUN number will be entered incorrectly to successfully complete the initialization procedure.

CORRECTION: The GM 10L80/90 ten speed transmission available on Camaro and a various Chevrolet and GMC models have a valve body Part Unique Number. This number is located on the valve body as seen in figure 1. Notice the PUN has a number 0 and a letter O, take note of the difference so the PUN is entered correctly for successful programming as seen in figure 2.
