

# Product Catalog Heating Solutions

For cars, trucks, light-duty vehicles, buses, off-highway and special vehicles

**2023/2024**

---

Dear customers, dear Webasto partners,

With this product catalog, Webasto offers you a comprehensive overview of the latest products for heating. In this way you are ideally equipped for your work with our heating solutions. The catalog is intended to help you prepare quotations quickly and easily, and to put you in a position to give professional advice at any time.

Furthermore, it gives you an overview of the special Webasto services for individual system solutions that you can expect from us as your business partner. Take up these offers and contact us at any time – we will be happy to assist you!

We wish you great success with our products,

Your Webasto team

# Webasto network

Expect comprehensive support from Webasto in all areas.  
Before, during and after the installation of your Webasto solution!

Our service partners actively support you in your day-to-day business – worldwide. Whether with effective training measures on new products or with practical tips and tools to make your work easier. This unique service network helps not only to fulfil the Webasto quality promise around the globe, but also supports you in your sales efforts. You can rely on the consistently high quality of products from Webasto: All our solutions meet the highest international quality standards and offer the latest technology.

A further benefit for you: We are never far away and can therefore identify ourselves with your needs on the spot and take your suggestions into consideration in the further development of our products and services.

Our very comprehensive product portfolio includes also heating, cooling and air-conditioning solutions for vehicles, boats, motorhomes and caravans and allows you to access perfect solutions for your thermal management.

**Please feel free to contact us for a specific catalog.**

# Webasto services

## Engineering services

Apart from a wide range of standard products, we offer you individually optimized system solutions. Whether installation position, operating temperature, operation at high altitudes, interface connection or the installation situation in the vehicle: we can work out an optimum solution for all your requirements. In this context, you can rely on our many years of experience in original equipment and the aftermarket. You profit from our high process and quality level, and our know-how in system integration, mechatronics and software development.

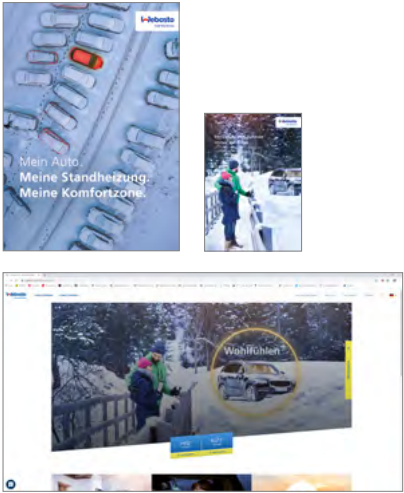

## Technical services

From the various parts of your application to extensive series of tests, Webasto offers you everything to ensure your solution functions perfectly. Our service is also at your disposal after installation for maintenance and spare parts.

- Efficient spare part management
- Secure login to the dealer portal (e.g. product documentation, installation instructions)
- Professional quality management
- Broad spectrum of test possibilities (e.g. climatic chamber, acoustic chamber, environmental tests)
- Technical support/online training

## The development process of a customized system solution:

- Identification of the existing boundary conditions and requirements
- Calculation of the necessary heating or cooling capacity
- Elaboration of an application solution or complete development of an individual system
- Proof of the customer's specific requirements
- System or application acceptance in the customer's works

## Marketing services

We ensure our global brand awareness and image branding through a wide range of measures.

- High-quality, target group-specific marketing tools for all media
- Support for our partners on customized marketing measures
- Advertising and mailing templates for customer activation and customer loyalty
- Point-of-sale marketing materials
- Product-specific selling argument lists
- Professional participation in trade fairs
- Broad array of sponsoring activities

# Webasto product portfolio

Our solutions for air conditioning systems and innovative energy solutions

Our very comprehensive product portfolio includes heating and air conditioning systems, thermal management and battery systems for electrical vehicles.

  - Specific accessories

## Market segments heating solutions

Webasto develops innovative heating solutions for the following markets

Cars

Trucks

Light-duty

Buses

Off-highway

Special vehicles

The right water heater for each vehicle class

No matter whether for compact, mid-size or luxury cars: Webasto offers heating solutions for every class that impress with stable heating performance and reliable, efficient operation.

eThermo Top Eco is an electrically operated water heater that can heat up the vehicle interior and/or engine. The eThermo Top Eco appeals to new groups of customers: garage and carport owners, short-distance drivers as well as environmentally aware motorists. The heater is operated via an electric cable connected to a 230 V power outlet. Thanks to the integrated trickle charge function for 12 V batteries, the car battery is charged during operation.

The latest generation of parking heaters, Thermo Top Evo, is specially developed for new car models and those with limited installation space. With different heating classes, the Thermo Top Evo offers the perfect heating solution for every car size. The most powerful heater in its class, the Thermo Top Evo 5+, easily heats vehicles with particularly large interiors and offers even faster and more efficient heating.

**Benefits of the Webasto solutions for cars:**

- Extremely small, space-saving design
- The lightest heater in its class
- Efficient and stable heating capacity
- Thermo Top Evo has low fuel consumption and minimized emissions during operation
- eThermo Top Eco has no emissions in operation
- Heat up vehicle interior and/or engine
- Thermo Top Evo can be combined with various control elements
- Installation kits for the most common vehicle models

Heating solution	Heating capacity (kW)

Electrically operated water heater

Fuel operated water heater

# Trucks

## A pleasant cabin climate at all times – independant of the engine

Engine idling is not only costly in the longer term, it is actually forbidden in many countries. Our Webasto non-idling solutions bring the cabin to a pleasant temperature – fully independently of the engine. That reduces fuel consumption and – as a positive side-effect – also the emission of pollutants. This comfort benefits the driver, too, both while driving and during his breaks.

An idling truck engine consumes on average three liters of fuel per hour. Added to that is the increased wear on the engine and other components. The reliable heating solutions and air-conditioning systems from Webasto ensure comfortable temperatures without incurring these costs.

For detailed information of available air-conditioning systems please see the dedicated Webasto cooling catalog.

- Benefits of the Webasto solutions for trucks:**
- No unnecessary running of the engine in idle
  - Reduced fuel costs
  - Optimized cabin temperature at all times without the engine running
  - Efficient use of the residual engine heat

# Light-duty vehicles

## Reliable climate for your business

Light-duty vehicles have to transport goods and people safely to their destination. Reliable and efficient heating, air-conditioning and transport refrigeration systems play a central role here. Webasto offers a wide range of powerful heating, air-conditioning and refrigeration solutions to meet every specialized transport demand. Whether temperature-sensitive medicines or other perishable goods have to be transported – we have a tailor-made solution available for every vehicle type and form of use.

For detailed information of available air-conditioning and refrigeration systems please see the dedicated Webasto cooling catalog.

**Benefits of the Webasto solutions for light-duty vehicles:**

- Engine and environment-friendly pre-heating and heating
- Installation kits for a wide variety of vehicles available
- Reduction in operating costs thanks to fuel saving and lower wear

Air heater

Water heater

# Buses

## Reliable climate comfort for a safe journey

To guarantee a safe journey even in challenging climate conditions, buses must be ready for operation right from the start. For this purpose, Webasto can rely on a broad product portfolio ranging from standard auxiliary heaters to complete and customized climate solutions, via air-conditioning systems as well as a wide range of accessories. With this range, we can equip buses of all sizes and offer customized climate solutions for any application.

For detailed information of available air-conditioning systems please see the dedicated Webasto cooling catalog.

**Benefits of the Webasto solutions for buses:**

- Comfort for drivers and passengers in all climate conditions
- High-quality, extremely reliable components
- Meet the most stringent environmental standards
- Innovative technologies guaranteeing the highest quality and efficiency
- Reliable and certified safety
- Customized to your needs

# Off-highway

## Do your job more efficiently

Irrespective of the climatic situation, off-highway machines have to be sturdy and ready for operation at any time. Not only the vehicles, but also the operators are subjected to extreme working conditions.

In order to meet the high demands on man and machine, Webasto has developed intelligent heating and air-conditioning solutions. These systems combine comfort and efficiency – and save fuel. For example, the parking heaters with the new engine-off technology that avoids unnecessary engine running at standstill.

For detailed information on air-conditioning systems please see the dedicated Webasto cooling catalog.

**Benefits of the Webasto solutions for agricultural and off-highway machines:**

- Fuel saving thanks to reduced engine idling
- Reduced operating hours of the engines
- Safe working conditions in all climate conditions
- Comfortable climate for the operator

## Special vehicles

Including fire trucks, ambulances, security vehicles, vocational work trucks

### Perfect environmental conditions – when every second counts

In rescue service, disaster control or firefighting you need to be focused from the very beginning on your operation. With the Webasto parking heaters and air-conditioning systems, special vehicles are ideally tempered which increase the safety, comfort and staying power for driver and crew. Parking heaters ensure de-iced and de-fogged windows even before the start of your special operation and offer a comfortable temperature within the vehicle. Thanks to the engine preheating, they also reduce wear and fuel costs.

For detailed information of available air-conditioning systems please see the dedicated Webasto cooling catalog.

**Benefits of the Webasto solutions for special vehicles:**

- Ideal climate conditions for drivers, crew and passengers
- De-iced and de-fogged windows at all times
- Wide product portfolio available to find the ideal solution for your demand
- High quality and reliability for the most challenging missions

As a worldwide leader for auxiliary heaters we offer our support for the specific project design of your heating systems (e.g. according to EN1789).

Air heater

Water heater

# Heating systems

Webasto air and water heaters offer your customers a wide variety of advantages

- Safety and greater comfort**
- Perfect view through ice-free and defogged windows right from the start of the journey
  - Relaxing break times thanks to low-noise operation of our products
  - Constant temperature in the passenger compartment thanks to intelligent temperature management
  - Precise and continuously adjustable temperature control

- Worthwhile investment**
- High availability of the vehicle
  - Worldwide professional service network
  - Long term spare part availability
  - Reduced fuel consumption and therefore cost efficient during engine idling times
  - Low maintenance cost due to the use of high quality parts within our products
  - Due to the optimized design our products have the smallest size on the market and therefore need minimum space requirements to be installed on your vehicle

- Environment-friendly**
- Low fuel consumption and minimized emission
  - Efficient and high-efficiency combustion technology

# Application of an air heating system

Webasto air heating systems can be ordered tailored to your needs. The standard components are combined into a basic scope of delivery and a specific installation kit. You may need additional application material, depending on the application requirements and the installation location. You can find these in our comprehensive accessories program.

**Control element**  
Choose from our portfolio of different control elements, such as a simple rotary switch, a MultiControl or the ThermoConnect App TCon2.

**Hot air intake system**  
Choose between fresh air and recirculating air mode, depending on the requirements or field of application.

**Electrical connection**  
A standardized wiring harness simplifies the connection of heater, control element and vehicle. It also offers a diagnostic possibility.

**Exhaust system**  
The resulting exhaust gas has to be discharged via exhaust pipes.

**Air heater**  
Air heaters are available with heating capacities from 2.0 to 5.5 kW.

**Combustion air intake**  
The required combustion air has to be drawn in selectively from a dry area.

**Fuel supply**  
A connection has to be made to the fuel tank. A fuel pump is part of the basic delivery scope.

**Hot air distribution**  
Configure the air distribution system individually using additional hoses, distributors and air outlets to achieve optimum heat distribution in the vehicle.

- Advantages of air heating systems**
- Low investment and installation cost
  - Easy integration in the vehicle
  - Short heating times
  - Individual configuration of the air distribution
  - Recirculating air or fresh air mode

# Air heaters

## Air Top 2000 STC

### The simple and cost-effective solution

The compact Air Top 2000 STC air heater is an impressive performer thanks to its versatility and low fuel consumption. Its compact construction means that it can be installed quickly either inside or outside the vehicle. The Air Top 2000 STC heats the air in the interior or cargo space quickly and quietly whilst keeping a constant chosen working temperature. Users can choose between recirculation and fresh air modes.

- 2 kW heating capacity
- Heats up quickly, more even and quiet heating procedure by use of fuel pump DP42.4
- Sturdy heater with compact dimensions and low fuel consumption
- Continuous operation possible
- Easy to service and maintain, diagnostic capability
- Suitable for use in vehicles for transporting hazardous materials (ADR)

# Air heaters

## Air Top Evo 40/55

### Evolution with more power and versatility

The Air Top Evo model offers greater comfort, safety and heating capacity for large commercial vehicles. Air heating ensures quick and efficient heating of cabins and cargo spaces. Energy consumption and noise are at a minimum thanks to the control system. An automatic altitude compensation system is included as standard.

Quick and easy installation makes the Air Top Evo an economical retrofit solution.

If required, two units can be combined in a modular fashion to allow for heating larger cargo spaces.

### The advantages of the Air Top Evo 40/55

- Up to 4.0/5.5 kW heat output
- Very low electrical power consumption thanks to Intelligent Blower Control
- Silent operation thanks to adapted blower speed and silent fuel pump (DP42.4)
- Automatic altitude adjustment till 2,200 m above sea level
- Suitable for use in vehicles for transporting hazardous materials (ADR)

## Range Plus system

Extends the range of E-Vans under cold conditions and ensures warm interiors

Despite new generation battery technologies and battery management systems, heating the interiors of electric vehicles during periods of cold weather limits the range of the electric car per battery charge by **up to 35 percent.**

- Heat escapes as a result of frequent door opening.
- Window areas cause vehicle interiors to cool down quickly.
- Transportation of temperature-sensitive goods demands a reliable and constant ambient temperature, for which energy is required to heat the cargo compartment.

Webasto's Range Plus system – a fuel-powered Air Heater plus fuel tank – significantly reduces the load on the vehicle's existing electric heater. It moreover ensures pleasant temperatures for passengers and everyone who relies on a warm vehicle for work.

### Retrofit of:

- Heat source air heater
- Heater control (MultiControl/TCon2)
- Air distribution (in-/outlet)
- Fuel supply (fuel tank, fuel filler assembly, refuel cap)
- Tank level indicator

### Technical release of solution:

- DEKRA (development with an authorized partner)
- Result of Range Plus:
  - **up to 80 km** additional range at comfortable interior temperatures
  - **up to 50 h** of additional heat

### Set includes:

- Air Top 2000 STC D 12 V/Air Top Evo 40 D 12 V
- Vehicle specific installation kit
- Air in-/outlet, air routing, external temp sensor, heater bracket, wiring harness extension, etc.
- Fuel tank, tank level sensor, tank level indicator (LED), fuel filler assembly, refuel cap
- Available for: Mercedes EQV/E-Vito Tourer/VW D.Buzz Cargo/VW ID.Buzz Van/Ford e-Transit, Stellantis K0 (Peugeot Expert/Citroën Jumpy/Opel Vivaro)

### Further possible applications:

- Student transport
- Transport of disabled or sick persons
- Mobile workplace
- Transport & storage of temperature sensitive materials

More information: [webasto-comfort.com/int/rangeplus](https://webasto-comfort.com/int/rangeplus)

# Application of a water heating system

Webasto water heating systems can be ordered tailored to your needs. The standard components are combined into a basic scope of delivery and a vehicle specific installation kit. You may need additional application material, depending on the application requirements and the installation location. You can find these in our comprehensive accessories program.

## Advantages of water heating systems

- Engine preheating and/or cabin heating
- Longer life of the engine thanks to reduction of cold starts
- Full integration in the existing heating system of the vehicle with a maximum of comfort for the passengers
- Use of the vehicle engine heat to bridge short standstill times without using the heater to reduce fuel consumption and emissions

# Water heaters

## eThermo Top Eco

### Fast, powerful, electrical

eThermo Top Eco is an electrically operated water heater. The eThermo Top Eco appeals to new groups of customers: Garage and carport owners, short-distance drivers as well as environmentally aware motorists.

The electric parking heater is integrated into the coolant circuit of the vehicle. A circulation pump provides for the homogeneous heating of the vehicle engine. At the same time, the vehicle fan propels the flow of warm air into the interior and right onto the windshield, which is therefore de-iced extremely quickly.

The heater is operated via an electric cable connected to a 230 V power outlet. Thanks to the integrated trickle charge function for 12 V batteries, the car battery is automatically charged throughout the entire duration of operation. The eThermo Top Eco can be conveniently controlled with a preset timer for the power outlet or with a WLAN-plug which can be ordered at Webasto.

There is a choice of two heating capacities, depending on the fuse protection type of the home connection:  
eThermo Top Eco 20 P (2 kW) for home connection with fuse protection of  $\geq 10$  A  
eThermo Top Eco 30 P (3 kW) for home connection with fuse protection of  $\geq 16$  A

- Retrofittable for cars with all types of drive systems
- Extremely small and light, weighting only 1.4 kg
- No emissions in operation
- Simultaneous and consistent heating of the engine and the interior
- Attractive price compared to fuel operated heaters
- Reduced installation time compared to Thermo Top Evo
- Trickle charge function of the vehicle's battery
- Available in two heating capacity options
- Convenient control possible with a preset timer or the Webasto WLAN-plug

## Thermo Top Evo

### Quick and reliable starting in winter

The Thermo Top Evo parking heater generation has been developed especially for new vehicles and those with restricted installation space. Thanks to the efficient heating system, the vehicle is ready to start quickly and reliably. Icy windows can be defrosted within a very short time and the cabin heats up very quickly.

There is a choice of three heating capacities, depending on the size of the vehicle. Thanks to its innovative control system, the Thermo Top Evo 5+ can be used to heat up very large interiors.

- Extremely small and a great space saver
- Weighting 2.1 kg, this is the lightest heater in its class
- Efficient and stable heating capacity
- Low fuel consumption and minimal emissions in operation
- Available in various heating capacities
- Vehicle-specific installation kits for the most common models

## Thermo Pro 50 Eco

### Light and powerful

The Thermo Pro 50 Eco is designed especially for use in light trucks and small to medium-sized commercial and special vehicles. Its compact dimensions and low weight enable it to be installed even in restricted space conditions. The engine can be raised to the operating temperature even before starting, thereby saving fuel.

The innovative control system ensures a pleasant temperature inside the vehicle, even when stationary and during breaks.

- Engine-independent heating mode for commercial vehicles with 2.5 to 5 kW heating capacity
- High product quality with a service life of 3,000 hours
- Especially economical and lower in emissions thanks to efficient heating power control
- Standard altitude adjustment up to 3,000 m, variant with operator up to 4,000 m
- Available for initial installation and retrofitting

## Thermo Pro 90

### Light and robust

The Thermo Pro 90 is designed especially for use in large commercial and special vehicles and in minibuses. It heats up the engine very quickly to optimum starting temperatures. Both fuel consumption and exhaust emissions are therefore reduced in the starting phase. New functions such as altitude compensation, Arctic Start and sliding heating capacity control allow new areas of application, even under extreme conditions.

The efficient and compact unit is easy to install and available for original equipment as well as for aftermarket installation.

- Engine-independent heating mode for commercial vehicles with up to 9.1 kW heating capacity
- Fast warm-up, even at the lowest temperatures, thanks to the Arctic Start function
- Very robust and most reliable heater with long service life
- Variants with automatic altitude adjustment up to 4,500 m available

### Thermo Pro 90 High Altitude

**Optimized product for high altitude requirements up to 4,500 m above sea level.**

### Thermo Pro 90 HDD (Heavy Duty Design)

**Optimized product for industrial and construction sectors.**

The Thermo Pro 90 HDD device satisfies additional standards for use in rugged off-road environment and can be used for SAE J1939 based off-board diagnostic.

# Water heaters

## Thermo Top Pro 120/150

### Next generation of high-performance water heaters for more comfort, safety and reliability

The Thermo Top Pro 120 (12 kW) and 150 (15 kW) constitute a new generation of water heaters in the high-performance segment. They are each available as 12 and 24 volt variants and ideally suited for use in construction and agricultural machinery, small to mid-sized buses, electric buses (as range extender at cold temperatures) and trucks.

Thanks to its efficient burner design as well as the intelligent diagnostic and safety system the heater fits in perfectly with the current times. Several sensors monitor exhaust gases as well as the coolant temperature and transmit these values to the control unit. New is the automatic altitude adjustment as basic equipment which ensures full heating performance up to 3,500 meters above sea level. In addition to this the heater is also ready for use under extreme conditions such as minus 40 degrees Celsius. Moreover, its compact size relating to its performance simplifies the installation in confined spaces.

The powerful coolant pump U4850 is part of the basic scope of delivery and provides a high volume flow as well as a good pressure resistance. It comes with an intelligent self-protection function and communicates with the heater's control unit permanently. So, the diagnostic process offers both an analysis of the heater and performance data of the coolant pump. The result: Simple diagnosis and quick maintenance in the workshop.

- Proven technology for a wide range of applications
- Automatic altitude adjustment up to 3,500 m above sea level as standard
- Various safety and diagnostic features
- Powerful coolant pump U4850
- Approved for paraffinic diesel fuels (HVO, GTL)
- Suitable for use in vehicles for transporting hazardous materials (ADR)

## Thermo plus 230/300/350

### Powerful and kind to the environment

The new Thermo plus series is significantly shorter and lighter than its predecessors, and has an extended service life while producing less starting noise and exhaust emissions. These powerful water heaters based on nozzle burner principle deliver outstanding heating performance with reduced fuel consumption of up to 4.5% compared to its predecessor series. Thermo plus heaters ensure optimal operating temperature of heavy-duty diesel engines before their initial start-up, thus preserving crucial engine lifespan and prolonging intervals between mandatory services. During stand-by phases, it also keeps a comfortable temperature for the drivers, without infliction of unnecessary stress to the engine and environment.

The supplementary heating function ensures a comfortable interior temperature for public transportation vehicles or tourist buses during their operation. Comfortable temperature levels in the passenger cabin are quickly established even without the main engine running, thus guaranteeing customer satisfaction by any weather and outside condition.

- Lower vehicle fuel consumption due to reduced heater weight
- Brushless EC motor enables extended running times and decreases the power consumption up to 16 %
- Lower internal consumption of the heater over a heating period
- Reduced exhaust emissions when starting
- Less starting noises
- Maintenance-friendly

## Thermo E+ 200/320

### Powerful state-of-the-art coolant heater for wide range of applications

Thermo E+ heaters ensure optimal operating temperature of heavy-duty diesel engines before their initial start-up, thus preserving crucial engine lifespan and prolonging intervals between mandatory services. During stand-by phases, it also keeps a comfortable temperature for the driver, without infliction of unnecessary stress to the engine and environment.

The supplementary heating function ensures a comfortable interior temperature for public transportation vehicles or tourist buses during their operation. Comfortable temperature levels in the passenger cabin are quickly established even without the main engine running, thus guaranteeing customer satisfaction by any weather and outside condition.

In addition to its low weight, the Thermo E+ series is a real winner in terms of consumption. And it was almost a foregone conclusion that our heaters would work efficiently even at temperatures as low as -40 °C.

- Low fuel consumption thanks to high efficiency
- Savings in fuel consumption also thanks to low heater weight
- Suitable for alternative fuels according to DIN EN 15940
- Fuel savings due to external control of the circulation pump
- Emission values significantly below current standards
- Noise emission optimized
- Powerful even in cold areas up to -40 °C
- High safety standards due to temperature sensors and self protection function

The coolant pump, U4850 as a single component, does not have its own ECE type approval nor its own CE conformity. ECE type approval and/or CE conformity is/are only possible in conjunction with Webasto heaters: Thermo Top Pro 120/150. CE conformity exists in conjunction with the Webasto heater: HVH. When using a pump without a connection to these heaters, and/or when using a pump as a standalone unit, U4850 the OEM is obliged to obtain type approval for the entire vehicle, including the pump, by the appropriate government body, and/or to get CE conformity awarded for the vehicle including its pump.

# Hot air system

## Advantages and features

Webasto offers a wide range of components for air distribution with high flexibility to fit any application.

### The advantages:

- Full range of mounting parts needed for any application
- Multiple combination possibilities to suit any application
- Coloured air outlets, black, white, grey and brown fitting to any interior
- Fast and easy installation, also in small spaces
- High temperature resistance from -40°C up to +140°C with PA6.6 GF30 glass fibre reinforced synthetic material

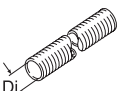

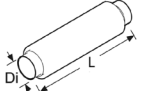

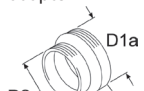

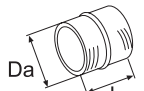

Webasto is not liable for applications made with non-Webasto air ducting parts, especially for parts not guaranteeing high temperature resistance.

# Hot air system

## Air flow resistance calculation

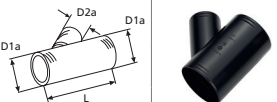

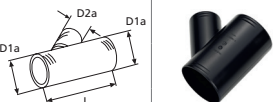

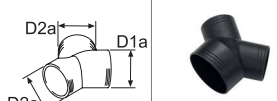

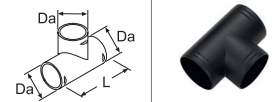

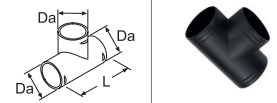

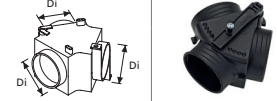

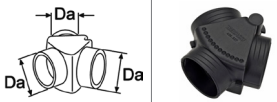

To ensure correct application with the correct air distribution system, it is important to have a continuous main line with openings that cannot be closed. The sum of the resistance points of the main line must not exceed the maximum number of resistance points for each air heater model. Lines branching off from the main line are not taken into account.

Consequently, the branches can also be designed with closable outlets. In the following table, several air ducting parts are listed. Exceeding the number of points (excessive air resistance of the heating air system) is detected by the heater after starting. For safety reasons, continuous heating operation is then no longer possible and the heater switches to control pause.

			Air Top 2000 STC: max. 325 resistance points			Air Top Evo 40: max. 550 resistance points Air Top Evo 55: max. 375 resistance points

# Air ducting combination possibilities:

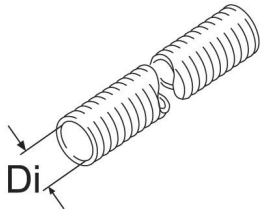

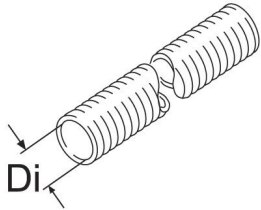

Air intake: At least air intake grille,  
all other parts optional

Air ducting: At least flex pipe & air outlet,  
all other parts optional.

Abbreviations

<b>Specifications</b>	
ECE	Economic Commission for Europe
EMC	Electromagnetic compatibility
HDD	Heavy Duty Design
HTM	Heating time management
IK	Installation kit
SOD	Scope of delivery
<b>Units of measurement</b>	
D	Diameter (mm)
Da	Outer diameter (mm)
Di	Inner diameter (mm)
H	Height (mm)
kg	Kilogram
L	Length (mm)
m	Meter
mm	Millimeter
r	Radius (mm)
SW	Wrench size (mm)
W	Width (mm)
<b>Electrical units</b>	
A	Ampere
kW	Kilowatt
rpm	Revolutions per minute
V	Volt
W	Watt
<b>Materials and fuels</b>	
APK	Aluminium paper plastic
EPDM	Ethylene propylene terpolymer rubber
FAME	Fatty acid methyl ester (fuel)
GA-A	Aluminium foil and aluminium coated glass fabric
GA2-A	Aluminium and aluminium coated glass fabric
H-M-A	Hart aluminium plastic aluminium
PA	Polyamide
PAK	Paper aluminium plastic
PAPK	Paper aluminium paper plastic
TPE	Thermoplastic elastomer
VOME-resistant:	Resistant against various diesel-like fuels; B7, B10, XTL, etc.

The Webasto Group is a global innovative systems partner to the mobility industry and one of the 100 largest suppliers to the automotive sector worldwide. The company's offering includes in-house developed roof, heating and cooling systems for various types of vehicles, batteries and charging solutions for hybrid and electric vehicles, and additional services related to thermal management and electromobility. Among the customers of Webasto are manufacturers of passenger cars, commercial vehicles, and boats, as well as dealers and end customers. In 2022, the Group generated sales of 4.4 billion euros and employed about 16,800 people at over 50 locations. The headquarters of the company, which was founded in 1901, is located in Stockdorf near Munich (Germany). For more information, please visit [www.webasto-group.com](http://www.webasto-group.com)
