#### **INSTALLATION AND USE**

**TOP-MULTI-TECH** pumps are recommended for pumping **clean water** and liquids that are not chemically aggressive for the materials from which the pump is made.

Because of their high efficiency and reliability they are suitable for use in applications such as domestic water supply from reservoirs, tanks or relatively deep wells, for drawing rain water from cisterns to water gardens or for use in irrigation systems, etc.

An internal electronic device starts or stops the pump automatically when the tap is opened or closed.

7	ELECTRONIC DEVICE	TOP MULTI-TECH pumps are fitted with an internal electronic device which starts the pump when the pressure of the system falls below 1.5 bar (eg. when opening a tap) and stops it when the flow falls below 3 litre per minute.
		It protects the pump: – against dry running; – against starting too frequently;

- against blockage: after long periods of pump inactivity the electronic device starts the pump every 48 hours for 10 seconds.
