

Tip-Sheet – Setting Singles for Automatic Repacking

In retail, larger “pack sizes” are often broken down into single units. The issue with this, is often, the single unit is branded with the same CSPC/SKU and UPC as the larger pack size. Here is how to set up a single item so the product will scan at the till and update the inventory automatically.

Step 1. Create Single Item in Product maintenance

Example: Original Product
 BUDWEISER 6 PACK CANS
 CSPC/SKU ID is 904334
 Product ID (barcode) is 62067335341

Create the new item:

- Click on the + symbol in the upper right corner
- New CSPC/SKU: 1904334 (Add a “1” before the original CSPC/SKU)
- New PRODUCT ID (barcode): 162067335341 (Add a “1” before the original)
- New DESCRIPTION: BUDWEISER SC
- Select REPACKING as the Vendor

Fill in the remaining product information.

Step 3. Sell a Single Item

Press the SINGLES button and scan the item (You may or may not have a SINGLES button depending on your screen set-up. If you do not have a SINGLES button, please refer to SPEED BUTTON SET-UP or ask for assistance.)

NOTES

The linked product will reflect the appropriate adjustment(s) created by sales of the singles item whenever an Inventory Report (Closing, Shortage, Licensee etc) is produced.

For inventory purposes, all singles are converted back to their original pack size after POSTING closing counts. (It is best to double count repacking items before posting.)

When reordering using the RE-ORDER GUIDES, singles sales will not show. The original pack size will reflect sales and suggest an order amount based on them.

Manual adjustments may still be made from RECEIVING for any products that have not been linked.
