Software Engineer

EXPERIENCE

Executive Assistant / Data Analyst   **July 2017 – April 2022**
Lead Me Media Marketing | Boca Raton, FL
- Tabulated and extrapolated data for clients and senior executives.
- Aided with project management, training over 6 employees, and handling correspondence.
- Debugged HTML code for advertisements on a daily basis

Pharmacy Technician   **March 2015 – April 2016**
Walgreens | Boca Raton, FL
- Processed and fulfilled prescriptions with 0% errors in order to ensure patient safety
- Displayed patient-oriented and comprehensive clinical pharmacy services with 30+ customers per day

SOFTWARE PROJECTS

Ridefile App
- Engineered a full-stack app that allows users to log in and track information about their cars
- Assembled front end using React components and JSON Web Token for user authentication
- Formulated with CSS to present data in a form visually pleasing to users in the car community
- Constructed using Google Firebase to store user's custom vehicle data

Quotes App
- Built an application that allows a user to store their favorite quotes and the author who said it
- Assembled with a FERN stack and designed with RESTful backend
- Fashioned the frontend using Ant Design and custom CSS

Restaurant list App
- Constructed a React application that allows a user to store their favorite restaurants
- Programed to allow the user to log in with either email or with Google Authentication
- Built with FERN stack and designed frontend using Ant Design

Wish list App
- Coded an application that allows a user to store their wishes and categorize these wishes
- Utilized a form with several fields and switches for a user to fill out
- Constructed using a MERN stack, Typescript, and custom SCSS for styling

Keypad with passcode App
- Designed to allow the user to enter any number using buttons on the front end
- Modeled after real-world keypads using Ant Design and CSS
- Devised to present the user with a message when the password was entered
