SKILLS

Programming Languages   Javascript | HTML | CSS | SQL

Technologies   React | Node.js | Express | MongoDB | Firebase | Git

PROJECTS

Chance 4 Pets Web App   **Sept 2022**

Live   Github Repo

- Built a full-stack web application that allows users to view animals available for adoption from several local animal rescues, post information and images for an animal in need of shelter intake, and implemented security with JSON web token that allows users to create an account, log in and favorite animals
- Front end development using React. Utilized CSS and Ant Design for clean styling. Back-end development using MongoDB document database. RESTful API with Express and Node. Hosted on Firebase Hosting and deployed on Google Cloud with Firebase Functions

Cassie's Calculator Web App   **August 2022**

Live   Github Repo

- Created a calculator web app using React. Styled with pure CSS and deployed using firebase hosting
