## Professional Experience

### Boca Code

*Assistant Instructor, Software Engineering / April 2022 – Present*

- Developing comprehensive pre-work and homework assignments that is enabling students to grow as Software Engineers within the 25-week course.
- Assisting 25+ students throughout the course and their final projects.

## Selected Projects

### Task Cultivator

*Developer / April 2022*

A full-stack web application designed and built from scratch using Python that allows users to create, edit and delete tasks, set a due date, and organize their tasks.

- Implemented RESTful APIs with the Backend logic in SQLAlchemy, and displayed user-specific tasks.
- Designed and developed UI components in Flask.

### Plant Baby

*Developer / March 2022*

A full-stack web application designed and built from scratch in a MERN Tech Stack that empowers plant enthusiasts to optimize the growth of their plants.

- Implemented RESTful APIs with the Backend logic in Express, Firestore and Mongo.
- Designed and developed UI components in React.
