

CURRENT & PENDING PROJECTS:

WE HAVE SEVERAL GRANT APPLICATIONS PENDING:

- **A federal “Building Stronger Communities Grant” to install solar panels on the basketball stadium.**
- **The Garry White Foundation to install further, upgraded solar lighting at the recreation reserve**
- **Sponsorship from the Community Bank to set up a collection point for soft plastics in our town.**
- **An application to the Bunyip Community Op Shop to upgrade solar lighting at the recreation reserve.**

Sadly we were unsuccessful in our application for a Community Energy Resilience Grant from AusNet to add a battery to the Tennis/ Netball Club solar system... We will work with the community to reapply so we can, hopefully, improve Bunyip’s energy resilience.

We also continue to assist user groups and other community organisations to electrify their premises and reduce their reliance on fossil fuel generated energy thereby reducing running costs.

We are investigating the feasibility of applying for a Neighbourhood Battery at the Recreation Reserve from DEECA’s 100 Neighbourhood Batteries grant scheme.
