Stop struggling with compliance risks & costly delays

Balancing fire safety, acoustics, sustainability, and seismic compliance can feel overwhelming—especially when dealing with multiple consultants.

Without a single streamlined solution, projects face:

- x Regulatory setbacks that delay approvals and occupancy certificates
- x Unexpected costs from last-minute rework and non-compliance fines
- x Increased liability risks that could jeopardise the entire project

The cost of inaction is too high. Compliance should be seamless—not a roadblock.

Simplify, Streamline, Succeed

At Brevity, we cut through the complexity of compliance so you can build with confidence. We provide end-to-end solutions for:

Fire, acoustic, thermal, and seismic compliance

Sustainable and regulatory solutions

Industrial warehouse racking safety

No confusion. No wasted time. Just smarter compliance.

Your Trusted Compliance Partner

With decades of expertise in compliance, engineering, and regulatory approvals, we've helped countless developers, builders, and subcontractors overcome compliance roadblocks. We know that every project is unique, which is why we tailor our solutions to meet the specific demands of: Residential, Commercial, Industrial, and Social Infrastructure Projects.

Our expertise spans:

- ✓ Fire, acoustic, thermal, and seismic compliance
- ✓ Sustainability and regulatory solutions
- ✓ Industrial warehouse racking safety

About us

The Risk of Doing Nothing

Without a proactive compliance partner, projects face:

- Regulatory setbacks that delay approvals and occupancy certificates.
- Unexpected costs from last-minute rework and non-compliance fines.
- Increased liability risks that could jeopardise the entire project.

The cost of inaction is too high. When compliance is streamlined, projects move faster, safer, and smarter.

Packages & Pricing

Option 1 - Best Price

This is our price for the minimum service only, everything else is an add-on. Our best price comes with a table of hourly rates so you know exactly what you'll be paying when you need extra.

Option 2 - Best Value

This is what we've found to be the real cost of engineering design based on many years of experience. It includes extras such as our 10-day free revision window, and we will be happy to attend a normal level of design meetings or pre-work consultations. The 'Best Value' price does have some exclusions, because some projects are significantly harder than average.

Option 3 - All Inclusive

At this level we customise the required services to the individual project and project team. We put together a single Guaranteed Maximum Price, and we take the risk for any price variations. Until the job is properly completed, we are there to get the work done.

How we price

Three steps to build confidently

Icon/Image

1. Schedule a call

Share your building's needs with our experienced team.
