### EXPLANATION OF THE BATTERY FLASH TEST

#### **ANALYSIS METHOD**

The analysis performed is a combined result of: The communication quality between the diagnostic hardware AVILOO Box and the on-board diagnostic interface of the vehicle. The live battery data and data that indicates the previous use of the high voltage battery, which is made available to the AVILOO Box by the battery management system during the measurement. The plausibility check and classification of the battery condition using the collected values and a comparison with the AVILOO Battery Cloud using Big Data algorithms.

#### FLASH TEST EXECUTION PROTOCOL

- ✓ Flash Test started.
- Vehicle detected.
- Starting data acquisition.
- Finished data acquisition.
- Analyzing data.
- Analysis completed.

#### DETAILED RESULTS OF PERFORMED CHECKS

State of Health (SoH - read from car manufacturer)\*

#### **Vehicle Information**

Measurements High Voltage System	
Mileage	25,139 km
Date	06/09/2023 10:58:51
VIN	SJNFAAZE1U0129999

#### Battery temperature Maximum cell temperature deviation Pack voltage Maximum cell voltage deviation Peak current during check

\*The SoH shown here was not calculated by AVILOO but corresponds to the SoH read out from the battery management system and

calculated by the manufacturer. AVILOO therefore does not guarantee the correctness of this SoH.
