details checked:		If available to the lodge.	

Emergency Plan - include any location/venue, activity or person specific emergency details/information Ensure everyone knows what to do in case of an emergency (if you are incapacitated) such as where the emergency equipment including communication device and first aid kit is located

- Recognise an emergency has occurred/ is occurring
- Assess the situation and determine the severity of the event
- **Apply Ngatuhoa Lodge Emergency Procedure** SMP part 1.11 Emergency plan.

First Aid Kit: Group First Aid Kit located at Lodge.

Additional Emergency landlines available at: Custodians Cottage.

Additional emergency No's: For all emergencies your first point of call is 111. Ask them for the assistance you require. Be prepared to provide them information on the patient. A copy of the Pre hospital reporting form can be found in the lodges SMP document; Part 4.3 PHEC reporting form.

Injury: Apply appropriate first aid. Bleeding: pressure, cover and elevate fractures: support, immobilise, minimise patient's pain, ensure an adequate blood supply to any fractured limbs, protect an open fracture from infection. Burns. Run under cold water for 30 mins to reduce heat. Keep burn clean. Cover with glad wrap. Treat for shock, get help, monitor and record vital signs. Record all relevant information such as how the incident occurred, any medication that was given and when.

<u>Death:</u> Cover, call police, initiate Ngatuhoa Lodge's Emergency Communication process, and manage group. Look for signs of life and apply appropriate first aid. If person deceased, cover the body, secure the group. Contac police for further advice.

Allergic reaction (Bee Sting or other): Establish if the victim is allergic if not treat irritation, remove sting etc. If they are allergic, this would have been established before activity, give medication e.g. adrenaline too largest muscle nearest the sting. If they are not allergic, they may choose to have an antihistamine (upon parent approval in the case of juniors) to help with the swelling and irritation. Rest and observe and seek medical help, evacuate if needed. If they are not allergic, they may choose to have an antihistamine (upon parent approval in the case of juniors) to help with the swelling and irritation.

Hazard Management Checklist

- □ Hazards assessed for significance
- ☐ Significant hazards included on page 1
