

The words of Winston Churchill, "To improve is to change; to be perfect is to change often" resonates deeply within us at Chumbaka, and change was the only constant in order for us to pull through this pandemic and be better.

We were all hustling to ensure our **programs transitioned smoothly online** without affecting our kids' learning, run a train-the-teacher program for close to **400 teachers throughout Malaysia**, and roll out **new exciting programs online**.

We want to take this opportunity to thank all our seven partners across Malaysia for pulling through with us during this time and thank the parents and teachers who believe in us to continue with our program.

THEIR STORIES

THE STREETS MAY BE QUIET, BUT THERE ARE BIG IDEAS BREWING ONLINE

Since the MCO started, Chumbaka Johor has been busy conducting classes online, with mentors and students keeping close contact via WhatsApp. We encouraged our students to share their projects with us, and here are some examples we received.

RAIYAN NABEEL, FORM 2

RADAR DETECTOR

Unable to find what he needed in the manual, he took the initiative to research online and added graphics into his radar detector project.

BRAVEN LEE, GRADE 7

MUSICAL BOX

Enthusiastic and eager to learn, he did his level best to explore further than what's in the manual. He completed this project on his own, to his satisfaction.

Parents were happy with the e-learning approach as reflected in the survey feedback we gathered.

With the help of technology, learning can continue online. While the streets may be quiet, there is a flurry of learning, and discovery happening online.

CHUMBAKA CYBERJAYA

STUDENT ONLINE SHOWCASE

On 27 June, students at Chumbaka Cyberjaya presented their game designs and innovation ideas! This round, our Game Design with Scratch students featured platformers and shooter games (with accompanying storylines too!), while our Arduino with Mobile Apps students presented how their innovations may help the elderly.

The audience grilled the students with questions and comments. And guess what? The students nailed it and held their stage very well.

We would like to give a special shoutout to our students and audience. Let's Stay Curious and Keep On Learning!

MAKER CLUB STUDENTS

RISE FURTHER

Our Maker Club students spent their Saturday getting grilled by our Yodas in order to rank up. One important thing we learn is that the pandemic doesn't stop students from learning and making. In fact, it accelerates their learning journey. As our Padawan Justin realises, "Never have a zero percent day" in order to keep the discipline of learning going.

Congratulations to our students for attaining the following rank:

Padawans: Diego

Jadh Alston and Benedia

Special thanks to Mr Choo, Ms Ee Yee, and Mr Eric for being our Yodas. Wise, indeed, they are!

May we all endeavour to continue our learning journeys.

UPCOMING EVENTS

JUNIOR INNOVATE:

THE SHOW MUST GO ON

Dear teachers,

Junior Innovate is back, and it is going to be online!

🕒 WHAT IS JUNIOR INNOVATE?

Find out more at <https://juniorinnovate.asia>

🎓 WILL TEACHERS BE GIVEN TRAINING?

Prior to the competition, free online Train-The-Trainer (TTT) will be provided to teachers who sign up for it.

👤 WHO IS ELIGIBLE FOR TTT?

Open to all public primary school teachers.

📅 HOW TO ENTER?

Register at bit.ly/ji2020 before 17 July 2020 and wait for our confirmation letter that will be sent to your email.

📱 HOW TO FIND OUT MORE?

Join our Telegram group *Junior Innovate Challenge 2020* at bit.ly/telegramji20

See you soon! Take care!

CHUMBAKA IS A LEARNING PARTNER WITH AIESEC MALAYSIA ON THEIR SPEAK UP PROJECTS

AIESEC, the world's largest youth organization, aims to contribute towards development of quality education in Malaysia by conducting Speak Up projects with local secondary school students.

Students are exposed to a 21st century learning environment where they discover their potential, build their self-confidence, and learn useful STEM skills.

In July and August, there are 11 local Speak Up projects across Malaysia to engage with students on online platforms. Chumbaka is a learning partner with AIESEC Malaysia in these projects.
