Footnotes:

1. The R-2 and R-M1 zones require 8,000 square feet for the first two dwelling units. The R-M2 and R-H zones require 10,000 square feet for the first two dwelling units.
2. Corner lots shall meet the minimum lot width requirement on both street frontages.
3. In a subdivision of eight lots or more, the lots shall be designed to provide for a variety of lot widths. Twenty-five percent of the lots in the subdivision shall have a lot width at least five feet wider at the required front setback, than the required minimum of the zone. Twenty-five percent of the lots in the subdivision shall have a lot width at least 10' wider at the required front setback, than the required minimum of the zone. In order to distribute the varied lot widths throughout the subdivision, no more than five lots in a row of the minimum lot width of the zone shall be provided.
4. Measured along the chord length for lots on curves.
5. Residential building lots should not face onto arterial streets. In those limited circumstances where the only available frontage is on an arterial street, it is important to achieve the greatest setback possible to protect residents from the noise and safety hazards associated with potentially high volumes of traffic and high speeds. Side yard setbacks should also include greater setbacks for those same reasons. Arterial streets are defined in 19.02 Layton Municipal Code.
6. Minimum side yard setback for an accessory structure on an interior lot is five feet if the accessory structure is located behind and separated six feet from the principal structure. Otherwise, the side yard setback for the principal structure would apply to the accessory structure. Accessory structures larger than 200 s/f or those constructed with a foundation shall be placed outside of all public utility and drainage easements. No portion of any accessory structure shall be closer than three feet to a property line. Accessory structures 200 s/f or less shall be located no closer than three feet from the side and rear property lines.
7. Refer to Section 19.06.020.6.
8. In Agricultural and Single Family Residential zones, primary structures constructed in conjunction with a Community Use as defined in Section 19.02.020 shall be allowed an additional one foot of building height for every one foot of additional building setback up to a maximum of 100' of height. Deeper building setbacks may

apply, or building height(s) may be tiered as one or more architectural step back(s) from the minimum setbacks. Nothing in this section shall be construed to limit the exceptions to building height found in section 19.05.030.

9. Accessory structures built in the R-1 zoning district shall be limited to 16' in height (measured to the peak of the roof) when placed within five feet of a side or rear property line. R-1 zones have a maximum height limit of 18'. For every additional one foot in height above 16', an accessory structure shall be setback one additional foot from all property lines. Accessory structures in the R-S and A zones that are above 18' in height (measured to the peak of the roof) shall have an additional one foot setback from all property lines for every additional one foot in height. The R-S zone has a maximum height limit of 23' and the A zone has a maximum height limit of 25'.
10. R-S lots over 20,000 s/f are allowed up to 50% maximum lot coverage.
11. Refer to Section 19.05.030(17)
12. When a landscape buffer is required along an arterial or collector street as outlined in 19.16.090 and is in the ownership of a homeowners association; the primary dwelling's minimum rear and /or corner side setback may be reduced by five feet when running conterminous with a required landscape buffer.

1. Those numbers which include a plus (+) sign after them indicate that for every foot of height above 35' on a principal use structures, and above 20' on accessory structures, an additional one foot of setback will be required.
2. Commercial uses adjacent to multiple family residential developments of two stories or more may reduce the rear yard setback to a minimum of 20'.
3. Each lot or parcel in the M-1 zone shall have a front yard of not less than 15'. In addition, any building having a height greater than 20' shall have an additional foot of front yard for every foot of height above 20'.
4. A primary structure located at least 500' from a residential zone boundary or property designated for residential in the General Plan may be increased to a maximum of 100' in height. The structure shall also comply with FAA and/or Military restricted air space, the property shall not be located within the APZ (Accident Potential Zone), and shall be located on a parcel with a minimum of four acres.
