

Climate Activism

This activity is designed to **introduce** students to the concept of **climate activism** by providing examples of notable **climate activists**. By learning about a small handful of the **many** climate activists around the world, students may feel **empowered** and **inspired** to take **climate action** themselves. This will also allow students to practise their research, analysis and presentation skills.

Instructions

Each student/pair/group should select **one** of the climate activists from the list that is provided. Students will then be given time to prepare a poster board about their chosen climate activist's **work** and **background**. They can later **present** their poster to the class. We recommend that each student/pair/group select a **different** climate activist so that the presentations don't become too repetitive.

We welcome feedback and would be delighted to hear your thoughts on this activity. Feel free to send an email to schools@climatescience.org and we'll be sure to get back to you soon :)
