

Write a Climate Solutions Song

Climate change and the environment are topics that we can learn about in all our subjects, not just science or geography! That is why today your students' task is to write a song related to the environment or climate change.

We've provided several resources for your students to use as inspiration as well as an excerpt from The Climate Change Song by Dr. David C. Shelley and Chris Ramaglia from the National Park Service in the U.S. Department of the Interior.

Encourage your students to be creative and to have fun! Additionally, you could have some or all of your students perform their song for the class or make a music video.

We welcome feedback and would be delighted to hear your thoughts on this activity. Feel free to send an email to schools@climatescience.org and we'll be sure to get back to you soon :)
