

Handwriting Practise With Earthly

In this activity, students get to practise their **handwriting skills** by copying down sentences from our first children's book, [Saving Planet Earthly!](#) Although it is by no means necessary to have read the book beforehand, we definitely recommend it. Each student should be provided with a copy of the handout.

The book is a great **introduction to climate change** and the ways it's affecting our planet and fellow species. You can find a read aloud activity for the book on our website for the 6-8 age group.

If you would like to enhance your own **understanding** of climate change, its consequences and solutions, why not take a look at our [courses](#).

We welcome feedback and would be delighted to hear your thoughts on this activity. Feel free to send an email to schools@climatescience.org and we'll be sure to get back to you soon :)

There is no planet B
