

## Colour in Your Favourite Earthly!

In this fun, artsy activity, your students will learn a little about our planet, Earthly, while they colour in some funky shapes. We recommend you print out several copies of these Earthlies so your students can choose their favourite one to colour.

If you have any questions about the short facts written out in each image, we recommend you go through our Climate Change Crash Course. These 3 simple chapters explain the fundamentals of climate change and provide a brief introduction to potential solutions. They can be found on the top of our courses site: [www.climatescience.org/courses](http://www.climatescience.org/courses)

We welcome feedback and would be delighted to hear your thoughts on this activity. Feel free to send an email to [schools@climatescience.org](mailto:schools@climatescience.org) and we'll be sure to get back to you soon :)
