CRESTCHEMICALS

Brass Brite
Metal Brightener and Cleaner

Description
Crest Brass Brite is a liquid chemical treatment used to brighten brass, bronze, and copper by a simple cold immersion. Brass Brite will restore a clean metallic brightness to the treated surface. It is particularly suited for the removal of tarnish from brass and copper alloy parts, and reconditioning valves and fittings, meter parts, screws, hardware and ornamental brass or bronze.

» Simple cold immersion application
» Fast acting. It works in less than 60 seconds.
» Easy application.

Method of Use
Application Methods
» Immersion

Mixing Instructions
» Ready to use, do not dilute.

Application Instructions
1. Remove any oil, grease, or paint prior to using Brass Brite.
2. Immerse parts in cold Brass Brite for 10 to 60 seconds, depending on the thickness of the oxidized coating to be removed. (Test on sample piece to determine the correct immersion time).
3. Rinse with clean water.

Product should be stored at no lower than 50°F and no higher than 100°F.

Caution
This product contains sulfuric acid and a strong oxidizing agent. Avoid contact with skin, eyes and clothing. Refer to product labels and Safety Data Sheets for precautionary and handling information.
