Chain Lubricant 100

Conveyor Chain Lubricant for Washer and Bake Ovens

Description

Crest Chain Lubricant 100 is a light viscosity oil, holding a suspension of self-lubricating metallic solids. The highly refined mineral oils act as a high flash carrier that carries the anti-wear Moly Disulfide to all the functioning parts of the conveyor chain. The high flash oils do not attract dirt and airborne pollutants, but they penetrate into all the small pins and bushings in the conveyor chain. This material lubricates and protects the steel parts from rusting. The use of this type lubricant will reduce wear on the chain, reduce link replacements, and lower the power requirements on the drive motor.

Since Crest Chain Lubricant 100 is a semi-drying type oil, it resists dripping onto the finished parts. With the small usage of this type material, money will be save and down time will be reduced.

Specific Gravity	0.82 to 0.99
Flash Point	145°F +
Color	Dark Gray
Temperature Range	0 to 600°F
Suspended Solids	Molybdenum Sulfide

Product should be stored at no lower than 50°F and no higher than 100°F.

Caution

Refer to product labels and Safety Data Sheets for precautionary and handling information.

Warranty and Liability Disclaimer

The above information and recommendations concerning this product are based upon our laboratory tests and field use experience; however, since conditions of actual use are beyond our control, any recommendations, or suggestions, are made without warranty, expressed or implied. Manufacturer's and seller's sole obligation shall be to replace that portion of the product shown to be defective. Neither shall be liable for any loss, damage or injury, direct or consequential, arising out of the use of this product.
