

**"Perfect Imperfection"**

I strive for perfection  
Even though I'm a perfect imperfection of Earth and it's intellect self expressing a  
endless message  
My DNA strand expands across the heavens  
All enfolded compacted and compressed in a total package  
All I know is that I'm a connect with the soul and essence of self and then know the  
selfless with that as my goal im selfish  
With that as my whole what else is  
I strive for perfection
