

Colorism

No matter how you try to avoid the color spectrum.
Black folk been hand picked like cotton.
Civil Rights attempted to hide the field hands.
The obscure scales of justice kept on plotting.
Maybe they'll have a dream and see themselves in color.
Color a new book with the crayons seen in each other.

No matter how you try to avoid the color spectrum.
America has mixed emotions and racism does exist.
Persons of Color have had their identities altered.
You can choose to be color blind if you wish.
I'll tell them to dream and see themselves in Color.
Place amazing grace upon their face. Right on Sister! Right on Brother!
