A DISTRIBUTED MARKETPLACE FOR IOT SENSOR DATA

Today companies make use of sensor data to optimize and monitor their operations. The result is a single purpose data landscape. What if we could make this data easily accessible to cities, organizations and entrepreneurs at an affordable price? DataBroker drives the evolution towards truly 'smart living'.

DataBroker is the first market place for sensor data using blockchain technology. It brings together all different participants in one place: sensor owners, data processors, and network owners.

EXAMPLE USE CASES OF THE DATABROKER MARKETPLACE

AGRICULTURE Farmers will be able to get reliable weather data in real time from sensors country wide to increase farming effectiveness & efficiency.

ACADEMIA Academics can access data from millions of sensors at low costs increasing the number of potential research projects.

ENVIRONMENT Environmental agencies can gather data from millions of sensors to understand environmental change and where to act.

SMART CITIES Smart City Initiatives can limit upfront cost of populating towns with sensors and turn expenses into investments.
