HOTDESK 03 CLUSTER

Product
SUMMARY

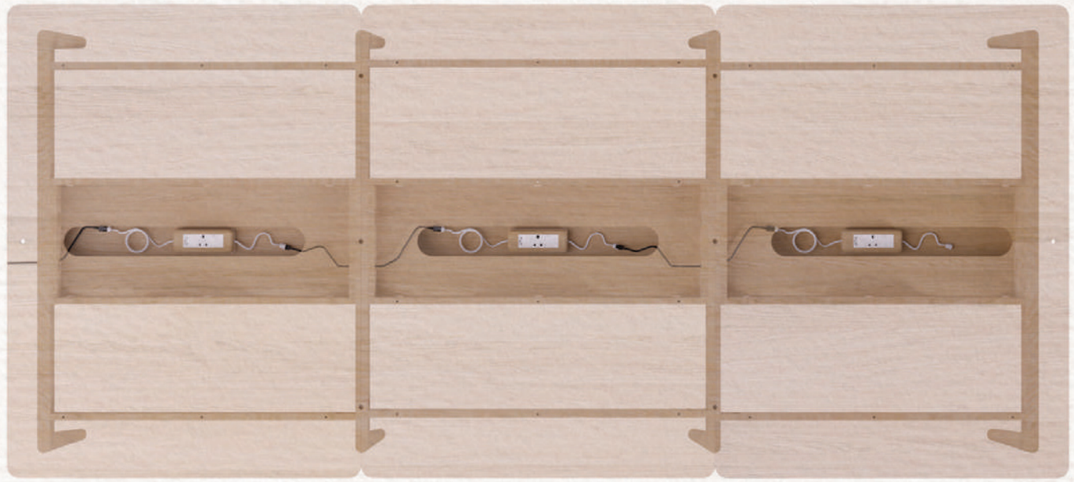

The Joburg Hot Desk 03 is designed for shared working, its open format allows several people to work side by side, while integrated screens provide a degree of visual privacy and separation. Its modular nature allows clusters to be configured to any spatial requirement. Cable tray allows for standard electrical and data reticulation. Balancing collaboration with individual focus, the Hot Desk 03 is a practical and distinctive addition to the modern office — creating a shared workspace that feels both personable and purposeful.
*Standard electrical not included.

LEARNING HOT DESK

Product SUMMARY

The Joburg Learning Hot Desk brings a warm, contemporary approach to shared learning environments. Crafted with clean timber construction, it features a generous work surface and integrated privacy screens that enable focused, independent work while maintaining a subtle connection to the surrounding space. The dividing panels offer essential visual and acoustic separation to help minimise distractions, making the unit ideal for study, training, and call centre applications. Designed for maximum versatility, the Learning Hot Desk seamlessly fits into educational institutions, libraries, creative studios, and modern office spaces.

Joburg
PHONEBOOTH

Product SUMMARY

The Joburg Phone Booth provides a dedicated, comfortable space for phone calls, online meetings, and confidential conversations within an open-plan office. Its compact, freestanding design creates privacy without requiring a separate meeting room, helping employees step away from the distractions and noise of the wider workplace. The booth combines a warm timber frame, a glazed door, and an acoustic felt interior to create a practical yet distinctive piece of workplace furniture.

Fully Customisable

The internal felt can be tailored to suit each organisation, from corporate colours and subtle branding to bespoke printed patterns, graphics or artwork. This allows the booth to become an integral part of the office interior rather than simply a functional enclosure.

Joburg
CHAIR 20 & TABLE 17

Product
SUMMARY

The Joburg Chair 20 was designed for a customer at the end of 2022 the chair 20 has rapidly become one of DKD's top sellers. With a light weight frame and small footprint it sits ideal in any commercial and residential environment.
With the need to advance the product into a fully fledged international retail ready product flatpackability became essential. Thus this new iteration. The added bonus of it being stackable and flat packable drives the usability, serviceability and efficiency across all value chains. With the choice of timber, finish, seat upholstery and backrest variant we offer each item as limited and unique.

OFFICE SHELVING

Product SUMMARY

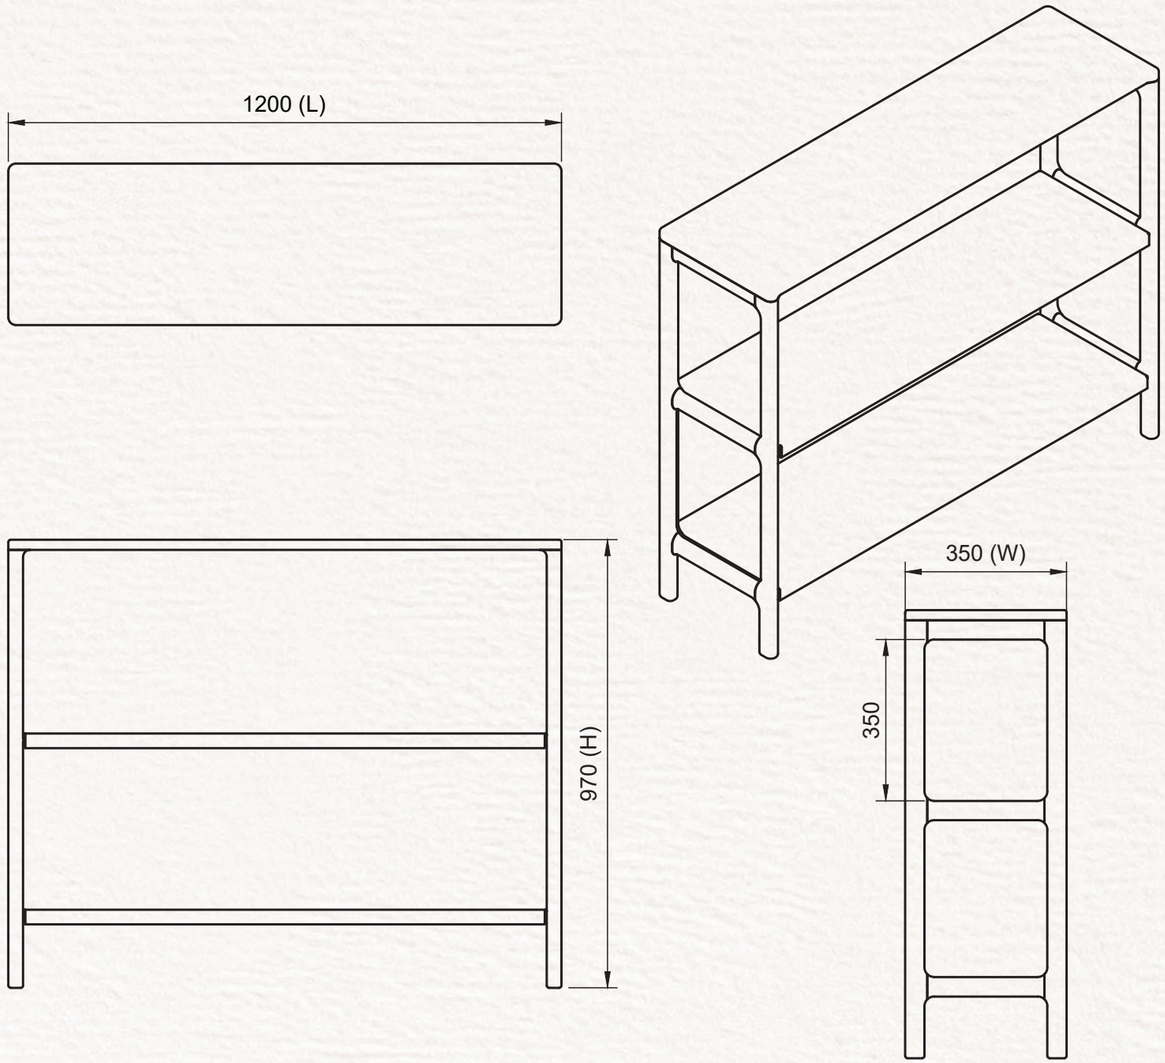

The Joburg Office Shelving was designed to bring practical storage and understated elegance to the modern workplace. This versatile shelving system combines a warm timber frame with clean white shelving for a light, contemporary aesthetic and various powdercoating colour options.

Available in two sizes — Small and Tall — it can be used individually or paired to create flexible storage solutions suited to a range of office environments. The open shelving provides accessible space for books, files, décor and office essentials, while its streamlined proportions help maintain an uncluttered workspace.

Small
