

PROPOSAL - SLAB

Owner / Agent: Tyler Woodall

Address: 12915 Falken Tower Ln. Austin, TX 78753

Phone: 908434905 Date: 10/28/2025

LevelSmart Foundation Repair Inc. ("LS") will provide all labor, materials, insurance, equipment, and supervision required to execute the scope of work described in this proposal at the above stated address.

- LS will install 18 press piling piers on the exterior of foundation, as designated on diagram. Diagram shows approximate locations.
- LS will install 0 press piling piers on the interior of foundation, as designated on diagram. Diagram shows approximate locations.
- After piers are installed, hydraulic jacks are used to lift foundation to improve foundation to as near as possible to level as the structure will allow. LS is not responsible for any damage that may occur from the foundation repair process, including damage to gas or plumbing pipes.
- Concrete removed to allow for excavation will be replaced. When holes are drilled through slabs, walks, porches, or driveways, LS will patch the concrete, but not the floor coverings. These patches will likely not match the original color of the concrete. There will be 2 break through locations. LS is not responsible for any damage occurring during excavation, including but not limited to damage to plumbing, floor coverings or dust.
- Excess dirt from excavations will be spread near structure or hauled away at no charge, as designated by customer.
- Shrubbery/plants removed to allow for the above-stated work will be replanted, but survival is not guaranteed.
- Wood Decks that need to be removed to allow access to foundation will be replaced only if possible. It is possible for the wood to be damaged during the removal process and LS is not responsible for replacement or re-installation of damaged wood.
- It is understood and agreed that in order for LS to execute the above stated work or any subsequent warranty work, damage may occur to the structure or its contents during the foundation repair process. For example, sheetrock, wallpaper, windows, countertops, or any rigid material may crack and Owner assumes all risks/repairs for damages and therefore LS is not responsible for any repairs to the damage or replacement of materials, including, but not limited to dust, floor coverings, irrigation systems or pipes (plumbing, gas, electrical).
- Work to be executed as described herein and according to the "Scope of Work" diagram, if provided. Scope may be altered due to unforeseen issues that are discovered during the repair process.

Additional Work To Be Performed: • Improve level as the structure allows.

**Lifetime Warranty:** Upon completion of the above said work and payment of contracted price within 30 days of completion date, LS warrants that the above stated section(s) of structure foundation will remain as near as possible to level as structure allows and those areas will remain within 1" or less of post repair measurements for the lifetime of said structure. Guidelines and limitations on any/all subsequent warranty work are outlined below, as well as in the separate Certificate of Warranty, which is incorporated fully-herein.

- Limitations on Lifetime Warranty:**
- As set forth in the Certificate of Warranty, which is incorporated fully-herein, the lifetime warranty only applies to the portions of the foundation where work was performed. There is no warranty of any kind, express or implied, to any area of structure not having piers installed by LS.
  - Should settlement occur during the warranty period, LS shall adjust said structure to improve level to as near as possible to level.
  - Warranty does not cover settlement or damage caused by tornadoes, earthquakes, hurricanes, floods, fire, sinkholes, vandalism, or any other Acts of God that are beyond LS's control.
  - Warranty does not cover settlement or damage caused by water intrusion that compromises the integrity of soil under or around structure.
  - Warranty will be voided if the structure is substantially altered, whether by modifications or additions to the structure, major plumbing leaks, excavation underneath or near the structure, or any other modifications or alterations to the work performed by LS.

Total Cost: \$ 9150<sup>00</sup> Price  Does include City Permit & 3<sup>rd</sup> Party Engineer Report.  Does Not  
 • 50% due upon mobilization Price  Does include post repair hydrostatic plumbing test.  Does Not  
 • 50% due upon completion
