## Version Overview

- Streaming services offer "year in review" pages, but for people who buy music, the options are limited and come with downsides (e.g. low quality visuals, selling data)
- Listening Reports in Doppler are beautifully designed, fun, and always private
- Listening history stays on your device and Listening Reports don't require 3rd party services
- Supports listening history from January 2020 onwards (report includes full year)
- Listening Report shows hours listened, top artists, top albums, top songs
- Offers a share button to generate a digital poster of the report to share with friends / on social
- Yearly listening reports require 1 hour of playback before it's available
- Listening Reports Screen includes overview of all time total time listened and total count of songs played
- New yearly reports will be available each December

## About Doppler

- A desktop-class music player on your iPhone
- Built specifically for people who buy music and support artists
- Beautiful, thoughtful design
- Import music and edit artwork/metadata without needing a computer
- Respectful of user privacy
- Independently owned and developed
- On the App Store since April 2018, >4/5 star rating

## Notable Features

- Edit Album and Song metadata
- Artwork search
- Import files from Files app, Safari, iTunes or AirDrop
- WiFi transfer for bulk importing from a computer
- Supports MP3, WAV, FLAC, AAC and more
- Create and organise playlists
- Yearly listening reports
- Liked songs
- Localisation for French, German, Spanish and English
