

## Greatly Discounted Medications

These are the medications we presently dispense from our office. Even if they have insurance, patients can save money on their medications by getting them from us. The average cost savings is approximately 55%.

Advantages to this service might also include: same day convenience, leaving the office with your medications - thus avoiding the wait at the pharmacy, and eliminating exposure to possible sick population at the retail store.

In the near future, additional (long-term) medications will be added to this list as well. Please call the office with any questions you may have concerning prices and processing.

<b>Generic Name</b>	<b>Brand Name</b>	<b>MG</b>
