Personal Profile

Front-end Engineer with a strong track record in developing web applications and improving user experiences. Experienced in working with modern frameworks such as Angular, React, and JavaScript (ES6). Contributed to the development of various types of UI applications, streamlining the review process and enhancing efficiency. Skilled in translating UI designs into code, writing unit tests, and collaborating within Agile development methodologies. Proficient in HTML, CSS, Git, and have a strong understanding of UI/UX principles.

Work Experience

CESAR   *Brazil*
Software Engineer   *Aug 2022 - Feb 2023*

- Contributed to the development of an internal legal document review web application for a client, which streamlined the legal review process and improved efficiency.
- Developing reusable components and templates using Angular, translating UI designs from Figma into code, writing unit tests, delivering new features, and fixing bugs.
- **Technical Skills:** Angular, TypeScript, Jest, HTML, CSS, Git, Agile development methodologies

Liferay   *Brazil*
Software Engineer   *Nov 2021 - Jul 2022*

- **Project 1**: Developed a React template for insurance companies, providing a customizable and user-friendly interface for their clients.
- **Project 2**: Worked on a theme library using SASS for Liferay Portal, which allowed for efficient theming across multiple projects.
- **Project 3**: Successfully upgraded the version of a Liferay project, improving its functionality and user experience.
- **Technical Skills:** JavaScript, React, CSS3, and HTML5, SASS, APIContext, Kanbam
- **Open Source Contribution**: Contributed to an open source Liferay Portal project on Github, improving the functionality and usability of the platform.

Nutcache   *Brazil*
Software Engineer   *Out 2020 - Out 2021*

- Worked on upgrading a project manager software from a traditional Model-View-Controller (MVC) architecture in .NET to a modern React Single-Page Application (SPA).
- Responsible for writing and reviewing code for JavaScript using React, CSS3, and HTML5. Participated actively in Agile ceremonies such as sprint planning, sprint retro, sprint review, and user stories refinement.
- **Technical Skills:** JavaScript, React, CSS3, and HTML5, Redux, Agile development methodologies

CESAR   *Brazil*
Software Engineer Intern   *Dec 2019 - Sep 2020*

- Started a project to provide a feedback system for college professors to give feedback to their students.
- DDeveloped React pages using Figma mock-ups and validating them with UI/UX designer. Reviewed code for JavaScript using React and Node.js, CSS3, and HTML5. Deployed the project using AWS microservices.
- **Technical Skills:** JavaScript, React, Node.js, CSS3, HTML5, AWS, RDS, S3, EC2

Education

FIAP   *São Paulo, Brazil*
Specialization in Software Architecture   *May 2023 - Current*

- Domain Drive Design, Kubernets, Containers, Dockers, Infrastructure

CESAR School   *Recife, Brazil*
Bsc in Computer Science   *Aug 2018 - Dec 2022*

- Graduated
