India's Elderly Population Projected to Reach 347 Million by 2050

Rising demographic shifts and the growing need for a formal elderly caregiving ecosystem in India.

An analysis highlighting the urgent necessity for trained caregivers and formal policies to support India's aging population.

KEY EXAM POINTS

- India's population aged 60 and above is projected to touch 347 million by the year 2050.
- The demographic projection underscores the critical need for a robust institutional caregiving ecosystem.
- Formal training programmes can help promote gender parity in the caregiving sector across the country.
- Existing small-scale initiatives need to be scaled up to recognize and upskill informal, unpaid family caregivers.

DID YOU KNOW..!?

Article 41 of the Indian Constitution directs the State to make effective provision for public assistance in cases of old age.

Maintenance and Welfare of Parents and Senior Citizens Act was enacted by the Parliament in **2007**.

Makkalai Thedi Maruthuvam is a flagship healthcare scheme launched by the Government of Tamil Nadu to provide doorstep medical care.
