

Zendocrin[®]

Detoxification Complex

dōTERRA[®]

Product Information Page

Description

Zendocrin Detoxification Complex is a proprietary blend of whole-food extracts in a patented enzyme delivery system containing extracts traditionally used to aid healthy cleansing and filtering functions of the liver, kidneys, colon, lungs, and skin.* Each whole-food botanical extract was selected specifically, based on its historical use, to support organ capacity to both provide protective cleansing and filtering functions for the body and to support the organ's own capacity to rid itself of stored toxic waste products.* Zendocrin Detoxification Complex uses an enzyme support system to help with whole-food extract absorption.* The Zendocrin Detoxification Complex is made with HPMC vegetable capsules.

See additional information on Page 2.

Zendocrin[®] | Detoxification Complex
Dietary Supplement
60 Vegetable Capsules

60225416

Primary Benefits

- + Contains extracts traditionally used to aid healthy cleansing and filtering functions of the liver, kidneys, colon, lungs, and skin*
- + Provides extracts historically used to support normal self-detoxification functions of the cleansing organs*

Directions

Take 2 capsules daily, 1 with the morning meal, and 1 with the evening meal. For optimal benefits, avoid increased toxic load to your organs through food consumption by reducing foods with artificial colors, preservatives, and sweeteners, and by increasing your consumption of pure water throughout the day.

Zendocrin Detoxification Complex benefits can be enhanced by taking with Zendocrin[®] Detoxification Blend.

Cautions

Pregnant or nursing women and people with known medical conditions should consult a physician before using. Does not contain milk products. Does not contain ingredients made from animals. Store in a cool, dry place.

Concept

The body is exposed to numerous toxins and environmental challenges every day. Vital organs act as protective filters. The largest organ of the body, the skin, acts as a primary defensive barrier. The lungs help filter the air of particulates and pollutants. The gastrointestinal tract performs significant cleansing and filtering of toxins ingested into the body through food. When toxins make it past these first line of defense organs, others, like the kidneys and liver perform additional filtering functions.

In a world filled with environmental pollutants and harmful chemicals found in things like prepared foods, beauty products, and treated water, the body's filtering system can be significantly challenged. Healthy organs have the capacity to meet these challenges under normal conditions, but many sub-optimal health conditions can challenge the healthy functioning of the liver, kidneys, colon, lungs, and skin.

Supporting healthy cleansing and filtering functions of these organs begins by limiting exposure to environmental toxins. Eliminating foods with artificial ingredients and those treated with pesticides and other harmful chemicals is also important. Hydrating frequently with clean water is also essential for healthy function of our cleansing organs. Supplementing a healthy diet with functional nutrients that provide targeted support for specific organs can also help maintain the healthy cleansing and filtering functions of the body.

Supplement Facts

Serving Size 2 Capsules

Servings Per Container 30

Amount Per Serving	% DV
Zendocrine whole-food detox blend:	928 mg **
Psyllium (<i>Plantago ovata</i>) husk powder, Rhubarb (<i>Rheum palmatum</i>) root extract, Kelp (<i>Ascophyllum nodosum</i>) thallus powder, Barberry (<i>Berberis vulgaris</i>) root extract, Milk Thistle (<i>Silybum marianum</i>) seed extract, Safflower (<i>Carthamus tinctorius</i>) flower extract, Acacia gum, Osha (<i>Ligusticum sinense</i>) root powder, Garlic (<i>Allium sativum</i>) bulb extract, Red Clover (<i>Trifolium pratense</i>) aerial parts extract, Burdock (<i>Arctium lappa</i>) root extract, Dandelion (<i>Taraxacum officinale</i>) root extract, Marshmallow (<i>Althaea officinalis</i>) herb extract, Clove (<i>Syzygium aromaticum</i>) flower extract	
Enzyme Support System:	30 mg
