## OCSTAMP Antibody

Catalog Number: PC-OC-STAMP

### General Product Information

|                              |                                                                                                                                                                                                                                                   |
|------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product</b>               | OCSTAMP                                                                                                                                                                                                                                           |
| <b>Description</b>           | Affinity Purified "OTTHUMP00000031209 antibody, RP11-179N14.1 antibody, zfp334 antibody, zinc finger protein 334 antibody, Thyrotropin hormone releasing receptor like antibody, C20orf123 Chromosome 20 open reading frame 123 ZNF334 " Antibody |
| <b>Verified Applications</b> | WB                                                                                                                                                                                                                                                |

### Physical Properties

|                            |                                                                                                                                                                                            |
|----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Quantity</b>            | 100 µg                                                                                                                                                                                     |
| <b>Volume</b>              | Inquire                                                                                                                                                                                    |
| <b>Form</b>                | Western Blot Positive Control                                                                                                                                                              |
| <b>Immunoglobulin</b>      | IgG                                                                                                                                                                                        |
| <b>Concentration</b>       | The concentration is set so that 20 µl per lane in Western and blotted with corresponding affinity purified antibody will give a clean band with a high signal to noise ration on the gel. |
| <b>Purification Method</b> | Affinity Purified                                                                                                                                                                          |
| <b>Clonality</b>           | Polyclonal                                                                                                                                                                                 |
| <b>Storage</b>             | -20°C for long term storage.                                                                                                                                                               |

### Application Protocol

|                     |               |
|---------------------|---------------|
| <b>Western Blot</b> | 1:500–1:2,000 |
|---------------------|---------------|
