About FacilitySight

What is FacilitySight?

FacilitySight is the facility intelligence platform for community gathering spaces, like libraries, museums, rec centers, and campuses. It's built for the teams who lead the patron experience and manage the building itself. Staff smarter, prove your impact when it's time to advocate for resources, and run your facility proactively, so every visit stays comfortable and every space keeps working for your community.

The Problems We Solve

- **Underutilized Spaces**
- **Reactive Maintenance**
- **Staffing by Guesswork**
- **Budget Requests Without Evidence**

Everything Included at One Price

FacilitySight combines software, sensors, and support into a single subscription. No hidden fees, no per-feature add-ons.

- **Real-Time Occupancy:** Live counts at every entrance and zone, so you always know how many people are in each space.
- **Event and Program Engagement:** Attendance is automatically attributed to each program and event. Track program performance over time.
- **Preventative Maintenance Reminders:** Stay ahead of routine checks like HVAC, fire safety, pest control, and electrical.
- **Maintenance Ticketing System:** Create, track, and dispatch service requests in one place. Guests can flag facility issues instantly with a scan of a QR code.
- **Environmental Monitoring:** Temperature, humidity, CO2, air quality, noise, and vape detection in one view, with proactive alerts before issues escalate.
- **60-Day Foot Traffic Forecasting:** A 60-day prediction model using historical patterns, day-of-week trends, and weather to help you staff with confidence.
- **Automated Reporting:** Reports generated and delivered on your schedule. Pre-built templates and one-click export mean no manual assembly.

Monitor Community Outreach

FacilitySight also powers outreach beyond your walls, including bookmobiles, mobile health clinics, and other vehicles that bring your services into the community. Stop performance analytics show visitor traffic and dwell time tied to each stop, side by side, so leaders can prioritize the stops that work and evaluate the ones that do not.

See What Draws People In

Which exhibit is actually pulling people in? Gravity shows how many visitors stop at each display and how long they stay, so you can compare what's landing, what isn't, and make the case for what comes next.

Your AI Data Assistant

Get instant answers from your data in plain English, no reports required. Just ask, "When's our busiest hour?" or "How many visitors came in last Tuesday?" and get the answer immediately.

Our Promise

- 90-Day Money Back Guarantee
- Always Free Support
- No Built-in Price Increases
- Minimum 2-Year Warranty

Powering FacilitySight

Sensor Capabilities

People Counting
Vape Detection
Odor Detection
Air Quality
Leak Detection
Sound Level

Integrations

Connect FacilitySight to systems you already use. Blend occupancy with your ILS for a fuller view of materials and space usage, or link POS and other data sources to uncover deeper insights.

Connectivity Options

Power over Ethernet

- or -

WI-FI / Cellular / LoRaWAN

Warranty

Every sensor includes a **minimum 2-year** warranty with continuous health monitoring.

Installation Options

Self-Installation

If your team includes IT staff or a trusted technician, we provide everything needed to get up and running. Step-by-step guidance, pre-configured sensors, and direct access to our support team throughout the process.

Assisted Installation

Prefer a hands-off setup? We'll connect you with a certified installer from our nationwide network of local providers. Same quality installation, no burden on your staff.

The Platform

FacilitySight unifies occupancy, environmental, and safety data into a single platform accessible from any device. Whether you manage one building or many, every insight lives in one place.

Always Real-Time

Live headcounts at every entrance and zone update continuously with sub-second latency. See exactly how many visitors are in each space at any moment.

99.9%
Uptime
Guarantee

Prioritizing Safety

FacilitySight aggregates emergency alerts from FEMA, NWS, and NOAA, geo-targeted to each of your locations. Occupancy warnings help support fire code compliance, and staff are notified within **seconds**, not minutes or hours. Environmental sensors also monitor air quality, CO levels, and vape detection so invisible threats are caught before they become incidents.

Powerful Reporting

Reports are generated and delivered automatically, with no manual assembly required.

Pre-Built Templates
Flexible Scheduling
One-Click Export

Privacy & Security Built In

FacilitySight is built on a privacy-first foundation. Our platform is SOC 2 compliant with enterprise-grade encryption and role-based access controls.

- **Anonymous by Design:** Our sensors detect presence and movement, not faces or identities. No images are captured or stored.
- **Your Data Stays Yours:** We never sell your data. Full stop. You own it, you control it, and you decide who sees it.
- **Secure Infrastructure:** All data is encrypted in transit and at rest with role-based permissions so only authorized staff can access sensitive information.

Schedule a Demo or Request a Quote

Every facility is different. Let us put together a custom quote based on your building, your goals, and your budget. No obligation, no pressure.
