Male managers	76.6	77.0	78.9	-	-	-
Female managers	23.4	23.0	21.1	-	-	-

Indicator included in the AQUASTAT Main Database:

Percentage of agricultural holdings with irrigation managed by women

Calculation: [% of agricultural holdings with irrigation managed by women] = 100 x [sum of agricultural holdings equipped for irrigation managed by women]/[sum of agricultural holdings with irrigation managed by men and women]

Legend:

Eurostat defines the "Total irrigable area" as follows: The total maximum utilized agricultural area which could be irrigated in the reference year using the equipment and the quantity of water normally available on the holding.

This variable matches "Area equipped for irrigation: total" in AQUASTAT which is defined as follows: The area equipped to provide water - via irrigation - to crops. It includes areas equipped for full control irrigation and areas equipped for partial control irrigation, such as equipped lowland areas and areas equipped for spate irrigation.

This indicator takes into consideration the sum of holdings that are equipped for irrigation.
