EXPERIENCE

IT Applications Programmer, Progressive Insurance

Cleveland, OH

IT Applications Programmer, ERO - Servicing2

March 2017 – Present

IT Applications Programmer Associate, ERO PolicyPro

January 2016 – March 2017

- Full stack web developer using Angular, TypeScript, Redux, .Net/C#. Code reviewer for Angular applications.
- Delivered several features for the the policy servicing rewrite while working on multiple scrum teams.
- Wrote RESTful .Net APIs to translate legacy backend systems to be used by modern web/mobile applications.
- Created Splunk dashboards and production verification plans to monitor features going live using IBM Tealeaf.
- Wrote unit and integration tests on both API and client side. Used SpecFlow, MS Test, and Jasmine.
- Hosted a weekly knowledge sharing session for 80+ developers to help keep up with current technology trends.
- Assisted in college recruiting, conducted interviews with candidates, and spoke to students about career growth.

GiveBackHack

Cleveland, OH

Cleveland Lead Organizer

January 2016 – Present

- Responsible for organizing yearly event that brings together 120+ developers, designers, and community members to develop sustainable, technology-based solutions to some of our most pressing social issues.
- Lead and coached the organizing team, promoted and marketed the event within the Cleveland Community.
- Negotiated funding and resources from sponsors to provide to participants so they can further validate their solutions. Over \$25,000 raised and awarded to date.
- Added features to and managed a WordPress site: <https://givebackhack.com>

Global Shapers Community - World Economic Forum

Cleveland, OH

Cleveland Global Shaper, Cleveland Hub Member

September 2017 – Present

- Communication Committee member helping with internal and external communications and social media.
- Worked on several projects to address some the United Nations' Sustainable Development Goals in Cleveland.
- Wrote [CultureCLE](#) website, an event series that highlights small local ethnic restaurants and teaches attendees about food and culture from that region. Website helped market for the event and led to first two events to sell out.
- Used Angular frontend app with a Github/Netlify CI/CD and a Contentful API to deliver data up to the client app.

Freelance Work

January 2016 – Present

- Created Websites using JAMStack. Used GatsbyJS, Contentful, Netlify. Used Vue and Firebase for some projects
- Designed book covers for clients using Adobe InDesign, Illustrator and Photoshop.
- Published to the Chrome Web Store an extension that parses and replaces specific words in the HTML DOM.
- Created a Twitter bot that tweets 'Hello World' in a new programming language triggered by an Azure function.
