

ASA

ERGOWARE
smart furniture

Description

With lines inspired by the design of an airplane wing, Asa was developed to meet the demands of air traffic control operations with full adaptability to the user with adjustable monitors and work area.

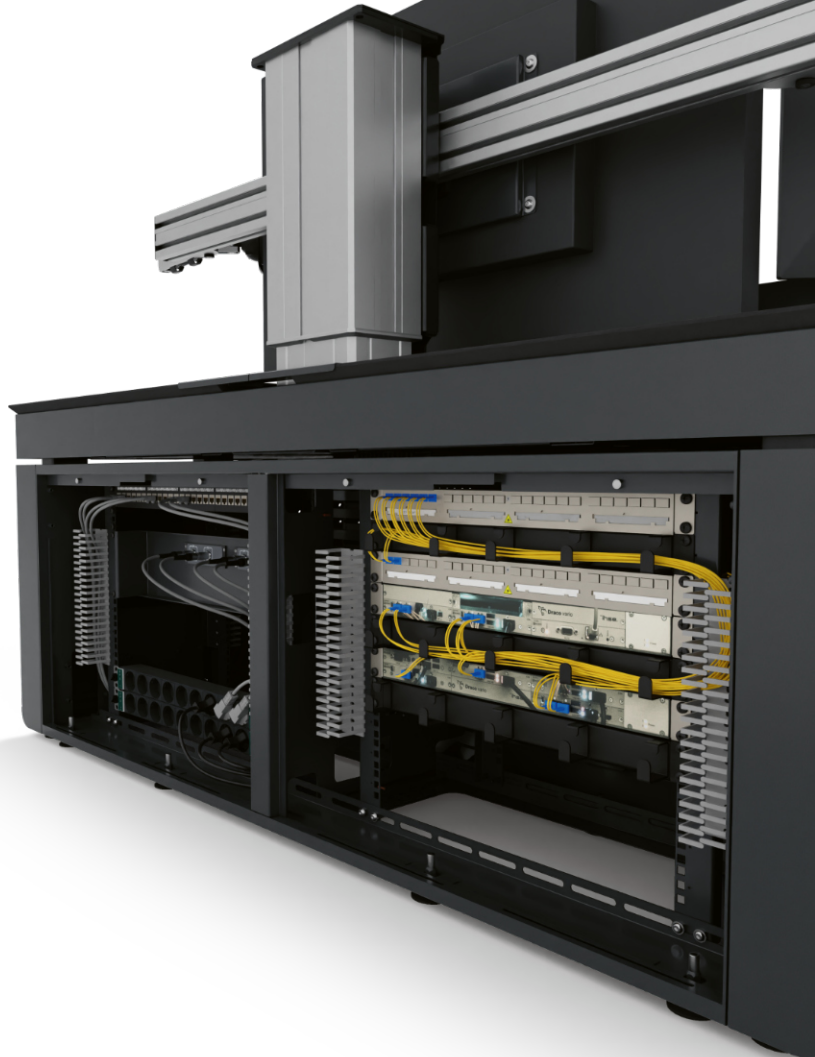

The Asa concept refers to the environment of an airplane cockpit with all the necessary equipment and mechanisms where ergonomics and efficiency are the main focus.

Technical Characteristics

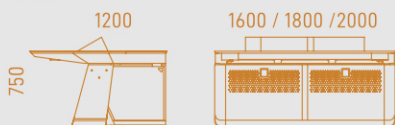

Following Ergoware's philosophy of modularity and flexibility, Asa guarantees a high storage capacity and integration of several equipment, which allows adapting the console to the most diverse technical needs.

Asa allows changes to the configurations, without neglecting the organization of integrated cabling systems and respective network, energy and communications connections.
