

MicroStep - MIS

30 YEARS
OF EXPERIENCE
1993 - 2023

Why to choose us?

Customized solutions tailored to client's specific needs

Development and production of advanced hardware and software products

Certified as a research-based organization with strong ties to the academic sphere

Educational, training, and consulting services to optimize the effectiveness of our systems

A team of experienced in-house experts and industry professionals with years of experience

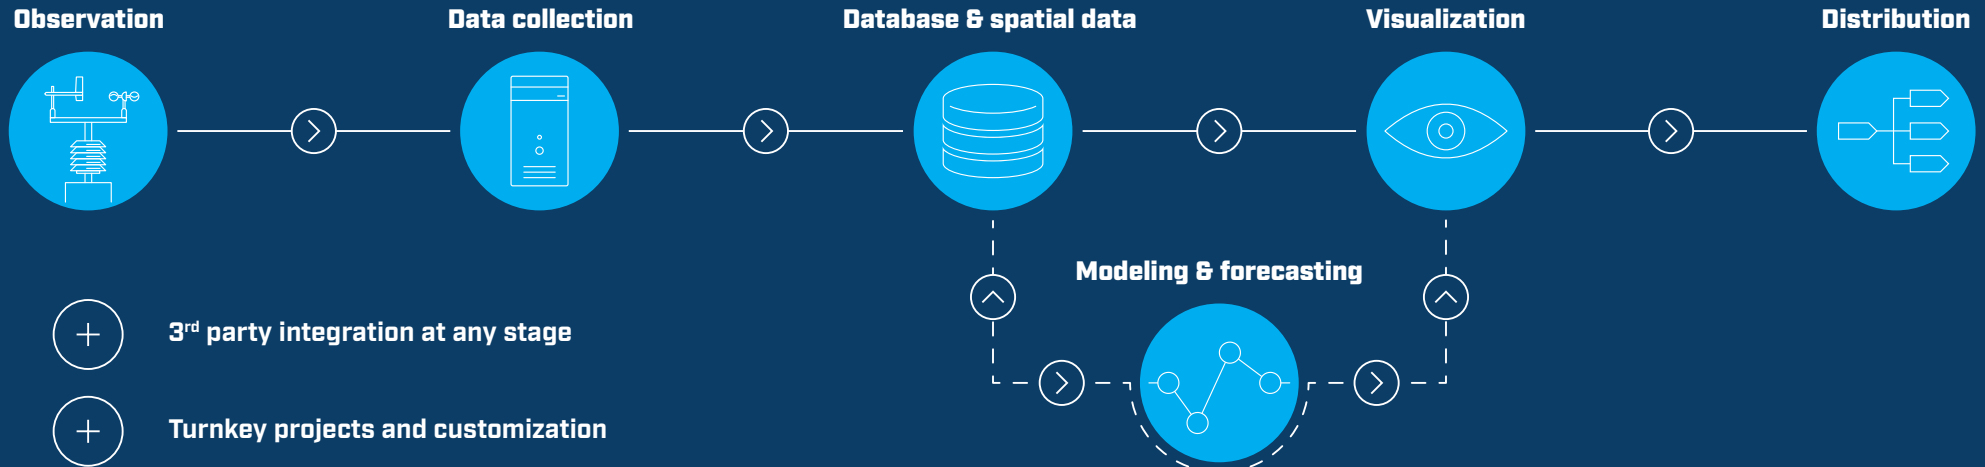

24/7 support and real-time monitoring of clients' systems

*Systems
you can
trust*

Complex Solutions for Weather and Environment

The company's key field activities cover

Meteorology

- Nationwide Meteorological Networks
- Automated and Manned Weather Stations
- Environmental Data Management System

Aviation

- Automated Weather Observation System
 - ATIS / VOLMET
 - Pilot Briefing
- Advanced Aviation Weather Decision Support System
- Remote Observer

Hydrology

- Automatic Hydrological Stations
- Water Quality Monitoring
- Hydrological Modeling
- Flash Flood Forecasting

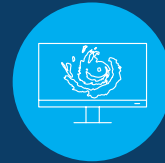

Marine

- Met-ocean Monitoring System
- Helideck Monitoring System
- Marine Models and Forecasting Systems
- Eddy Covariance Flux System

Radiation

- Radiation Sensors and Monitoring Devices
- Radiation Monitoring System
- Radiation Dispersion Modeling

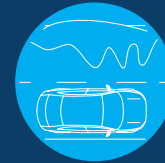

Modeling

- The Complete Modeling and Forecasting Suite
- Atmospheric, Hydrological, and Marine Modeling
- Nowcasting
- Severe Weather Warnings

Early Warning

- Crisis Information System
- SIRENY Siren Warning System
- Intelligent Crisis Management and Decision Support System

Road Weather

- Road Weather Sensors and Stations
- Road Weather Information System
- Visibility (Fog, Sandstorm) Modeling, and Forecasting

Calibration

- Automated Calibration Software
- Humidity Calibrator
- Integrated Pressure Calibrator
- All-in-one Calibration Systems
- Accredited Calibration Services
