

AirTalk® 5000

Design for the need of ATCO's around the world

LOW WEIGHT
Extremely designed for low weight and high stability.

MONAURAL OR BINAURAL
headset for use in the ATM environment.

ROTATING SUSPENSION
The rotation allows a perfect fit even while moving the head. The microphone can also be used on either side.

SOLID AND STABLE
Strongest steel wires provide reliable communication and long life cycles.

CALM NOISE LINE
The **technology (CNL)** is clearing and depressing unwanted and unintended noise from the structure of the lightweight headset, especially on the cable.

INDIVIDUAL
Adjustments and connectivity to **any VCS system.**

FLEXIBLE HEADBAND
Newly designed, with best fit for every size.

COMFORTABLE SPACER
The spacer are designed to provide a perfect fit with an comfortable pressure.

COOLMAX®
Technology for the ear cushions with highest comfort, help to feel comfortable all shift long.

ACOUSTIC SHOCK PROTECTION
Protection of the user's hearing.

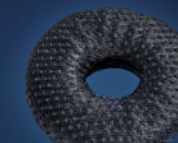

MICROPHONE CHOICES
Different microphone types are available, such as short or long gooseneck, electret and dynamic versions, incl. state of the art noise cancelling.
