THE ONLY GLOBAL
VOICE OF AIRSPACE

SHAPING
OUR
FUTURE
SKIES

canso.org

CANSO is the Global Voice of Airspace

Our purpose is to bring together the full spectrum of the world's manned and unmanned air navigation service providers, leading industry innovators and air traffic management specialists to share knowledge, develop best practice and shape our future skies.

CANSO believes that the use of airspace must be maximised to its fullest potential as a global resource through the creation of a unified, optimised, sustainable and safe environment where people and goods move effortlessly in a mix of manned and unmanned vehicles.

This will only be achieved through traditional manned traffic service providers working closely with unmanned traffic service providers to shape international rules and procedures that will directly impact operations and the industry overall.

Why Join CANSO?

As a CANSO member you can:

- Become part of the global traffic management community and shape the direction of the industry and future airspace
- Influence the development of national, regional & global aviation policy and regulation of manned and unmanned traffic management services through powerful and proactive advocacy initiatives
- Extend your network to raise the profile of your organisation across the industry through our global and regional events, workgroups and online platforms, which connect over 20,000 individuals
- Get closer to your customers / suppliers and other stakeholders in the industry through our on-line platforms and in-person conferences and meetings
- Learn about new developments and secure opportunities to solve safety and operational challenges facing your organisation by engaging with experts through workgroup activities
- Access industry news to understand the direction of the industry and how it will affect your organisation
- Create opportunities to develop your staff through participation in international initiatives.
- Secure 5% discount on your exhibition space at CANSO's Flagship event – Airspace World.
- Secure free delegate places at CANSO's Leadership Summit.

Extensive workgroup initiatives

CANSO's active community of Airspace Experts are driving a number of important initiatives. The safe integration of all types of air traffic is key to a successful aviation industry and safety lies at the heart of all CANSO's work programmes which offer members enhanced access to industry and government experts.

CANSO operates three standing committees and over 20 work groups covering a wide range of topics driven by Member needs and contributions.

The effective use of airspace, understanding the needs of all users including new entrants and how to best leverage the opportunities from emerging technology to raise productivity and efficiency are just some of our key focus areas, in particular, in the areas of high-altitude operations, integration of UTM, RPAS and digital towers.

As a recognised body, CANSO has extensive access and leadership roles in global and regional regulatory bodies providing a unique opportunity to drive effective advocacy to shape airspace and traffic management regulations.

CANSO work groups continue to share best practice, build on our standards of excellence for safety management systems; extend human performance capabilities and manage key risks.

Membership Details

CANSO membership includes organisations from all aspects of Airspace and Air Traffic Management.

Our global membership comprises:

- **Full members**
Air Navigation Service Providers (ANSPs)
- **Intermediate**
Aerodrome Service Providers, ATM data Service Providers (ADSPs), Vertiport Service Providers and USSP/ UTM Service Providers
- **Associate Members**
Suppliers of goods and services to the traffic management industry and aircraft operators.
- Educational and research-focused institutions seeking to advance education, research, and knowledge dissemination in the aviation field maintaining legally recognised non-profit or charitable status. Members of this category must commit to CANSO's mission of fostering innovation, enhancing safety, improving efficiency, and promoting sustainability in air navigation services by contributing to the collective knowledge pool.

Works with
90+
industry
innovators

Connects
20,000
individuals across
the industry

Collaborates
with over
90 ANSPS

Supports **90%**
of world air traffic

CANSO has five defined regions.

- Africa
- Asia Pacific
- Europe
- Latin America
- Middle East

Our Head office is in Amsterdam and we have 4 regional offices in Brussels, Johannesburg, Miami & Singapore

Full details of Membership and our online application forms for each membership category can be found on our website.
