

# AIRPORT DRIVERS NAVIGATION AND ALERT SYSTEM

A solution for **AIRPORT OPERATOR without an A-SMGCS environment** who wants to improve the safety, efficiency, and convenience of fleet managers and airport drivers in complex and busy airports, especially in low visibility conditions.

## KEY FEATURES:

*RWY occupancy monitoring*

*Runway incursions prevention*

*Automatic Alerting*

*Airport Moving Map*

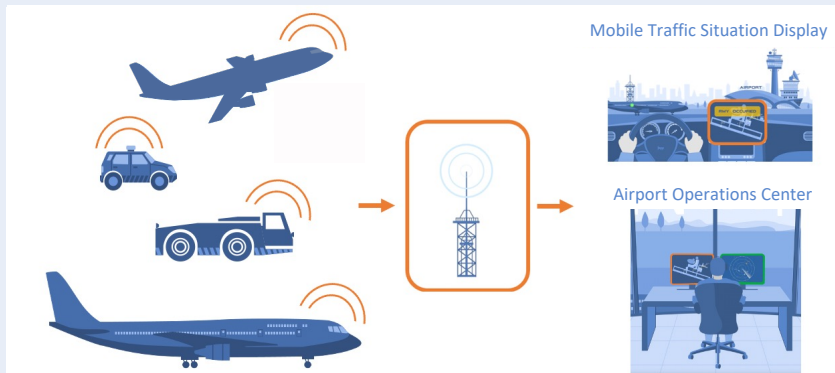

*Real-time traffic updates*

*Traffic monitoring system*

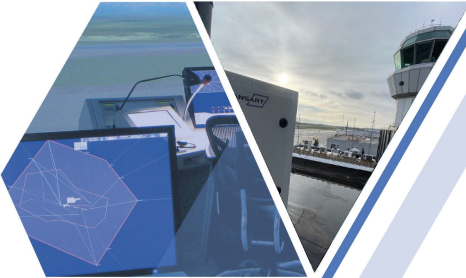

## HOW DOES IT WORK?

## ADVANTAGES:

- *Situational awareness down to the driver level*
- *Safety improvement*
- *Continuity in low visibility conditions*
- *The digitalization of business processes*
- *Data accumulation for statistics and KPIs calculation*
- *From CAPEX to OPEX*
- *Sustainability and earning capacity maximization*
- *Rapid deployment, no deep staff training is required*
